

Reliable & fast Internet for businesses

Business Internet solutions, custom-fit to your business.

NEWT’s Internet solutions offer cutting-edge connectivity with a focus on reliability and speed. We provide a range of services to ensure that your business stays connected with seamless performance. Our advanced infrastructure is designed to handle increasing demands and deliver exceptional service, backed by our robust, award-winning customer support team.

NEWT Nitro Fibre for your Business

With symmetrical speeds of up to 3G, NEWT Nitro’s FTTP technology is a great option for most businesses, and crucial for businesses that rely on data-intensive tasks such as video conferencing, cloud computing, and large file transfers.

[NEWT Nitro](#) delivers high-speed fibre connectivity directly to your business via fibre optic cables. We offer a range of service tiers, including voice, internet-only options, and bring-your-own-device packages. This flexibility allows you to customize your service to meet the specific needs of your business, ensuring you only pay for the service and support you need.

Available across Ontario and Quebec. Service and pricing depend on availability to address and service tier selection. Standard Support and MTTR.

High Speed DSL For Your Business

With downstream speeds of up to 50 Mbps and upload speeds of up to 10 Mbps, NEWT's DSL FTTN technology can satisfy the requirements of most small to medium-sized businesses.

NEWT DSL can be used as a primary Internet connection for your business or can be leveraged to interconnect multiple sites to create a large private network. Combined with NEWT ECMP, businesses can aggregate multiple DSL connections to affordably add circuit redundancy and bandwidth scalability, leading to improved speed, quality and reliability. This ensures that a single link failure will not impact critical business applications.

Available Across Canada. Service depends on availability to address. Standard Support and MTTR.

NEWT Business Ethernet Fibre

With symmetrical speeds up to 1G over a robustly housed fibre optic connection to the customer premise, ethernet fibre offers reliable, symmetrical bandwidth that is readily scalable.

Our business-grade fibre uses fibre-optic infrastructure to provide a direct connection for uncompromised, high-speed transmission of data. This reliable medium is not affected by electromagnetic interference and is protected from physical influences by a rigid conduit or armoured cable. This service benefits customers who require a reliable, high-speed connection, and who host web, email, and other applications servers.

Available across Canada. Service and pricing depend on availability to address. Priority Support and Same Day MTTR.
