CO-LOCATION SERVICES

Security and Reliability in the Heart of Waterloo

Our co-location services allow you to install your equipment in a secure, high-tech, convenient, and green facility located in the heart of the Waterloo Region. Our approach is simple – provide the most secure and reliable data hosting services at extremely competitive pricing by using premium upstream providers to ensure the best possible connection for our customers.

RELIABILITY
Our data centre was designed and built from the ground up using state of the art equipment from Eaton, Schneider Electric and Generac for electrical systems and a Cisco core network. Each rack is fully equipped and protected against small outages.

SECURITY
We restrict access only to authorized personnel. Off-site security personnel monitor all perimeter doors and security alarms. Digital surveillance video cameras monitor and record entry and exit to prevent unauthorized activity.

NETWORK
Existing fibre connectivity to multiple carriers and a backup point-to-point wireless connection we ensure redundant connectivity to the internet and provide 99.99% uptime.

COOLING
Our data centre is equipped with redundant, independent cooling units, designed to keep all customer equipment operating at optimum efficiency. Our high capacity system runs 24x7x365.

SCALABILITY
We offer 1/8, 1/4,1/2 and full rack packages. Each rack has 6000 watts of power available at 208VAC and comes with the option of 12 Cat6 connections to our core and fibre connectivity.

EFFICIENCY
Through energy efficiency and the increased procurement of green electricity, Rack & Data has been able to reduce greenhouse gas emissions by designing eco-friendly co-location that significantly reduced our carbon footprint.
