

For Immediate Release – May 28, 2026

Pine Cliff Energy would like to provide an update concerning the crude oil release at a well site located approximately seven kilometres north of Sundre, Alberta.

Cleanup activities have now been substantially completed. Pine Cliff Energy appreciates the cooperation and patience of nearby residents, as well as the support of local authorities and response personnel.

The company continues to work closely with the Alberta Energy Regulator and other relevant agencies and remains committed to safe and responsible operations in all communities where it operates.
