

### Scivola oval - Kit R - pendant/button, 38-47 mm door thickness

### Description

Kit with two pendant/button handles on brass plates, without keyhole. Notched locking cam on the outside for emergency opening. All the elements have been designed to eliminate any superfluous projections.

## Use

For concealed, sliding timber doors on bathrooms or any room where the door is closed from one side only and does not require a key to lock it. Suitable for panels with a thickness of 38 to 47 mm.

## Fastening

The plates are not secured by visible screws but snap onto striker plates.

**Note.** All the kit components come in a single package.

## STRIKER PLATE ASSEMBLY AND DIMENSIONS

## PLATE ASSEMBLY

- 1) Drill the panel
- 2) Insert the striker plates in the holes and fasten them with the screws
- 3) Snap the plates onto the striker plates

**Note.** Fasten the striker plates to the panel before snapping on the plates.
