WHAT IS THE PURPOSE OF THIS UPDATE?

Britannia Financial Services Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

DESCRIPTION OF THIS FUND

The Fund invests in international shares through investment funds operated by our Investment Manager, with a small allocation to cash for operational liquidity. Its investment strategy is to aim to achieve long-term capital growth through a structured exposure to listed global shares. Investors are exposed to developed and developing economies through an efficient exposure to a highly diversified pool of assets, using both qualitative and quantitative investment techniques.

The objective of the Fund is to aim to achieve a gross return before tax, fees and expenses at least equal to or higher than the MSCI All Country World Accumulation Index (net dividends reinvested).

Total value of the Fund	\$39,877,026
The date the Fund started	19 May 2011

WHAT ARE THE RISKS OF INVESTING?

Risk indicator for the Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five-year period ending on 30 September 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this Fund.
