FUND UPDATE

For the quarter ended 30 September 2026

Integral Master Trust

Diversified 40 Fund

This fund update was first made publicly available on 29 October 2026

WHAT IS THE PURPOSE OF THIS UPDATE?

This document tells you how the Diversified 40 Fund (**Fund**) has performed and what fees were charged. The document will help you to compare the Fund with other funds. Britannia Financial Services Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

DESCRIPTION OF THIS FUND

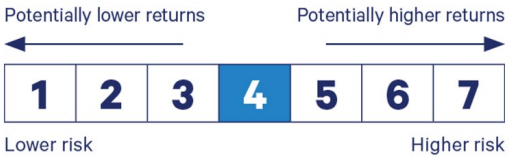

The Fund invests in a diversified portfolio containing both growth assets (shares) and defensive assets (international fixed interest and cash). Its investment strategy is to have a bias to defensive assets and to aim to generate consistent returns. Exposure to growth assets is obtained through investment funds operated by our Investment Manager. Investors are exposed to developed and developing economies through an efficient exposure to a highly diversified pool of assets, using both qualitative and quantitative investment techniques. Exposure to defensive assets is obtained through international fixed interest and cash investments.

The objective of the Fund is to aim to achieve a gross return before tax, fees and expenses at least equal to or higher than the weighted average of the applicable benchmark for each of the asset classes.

Total value of the Fund	$46,206,233
The date the Fund started	25 May 2011

WHAT ARE THE RISKS OF INVESTING?

Risk indicator for the Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five-year period ending on 30 September 2026. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

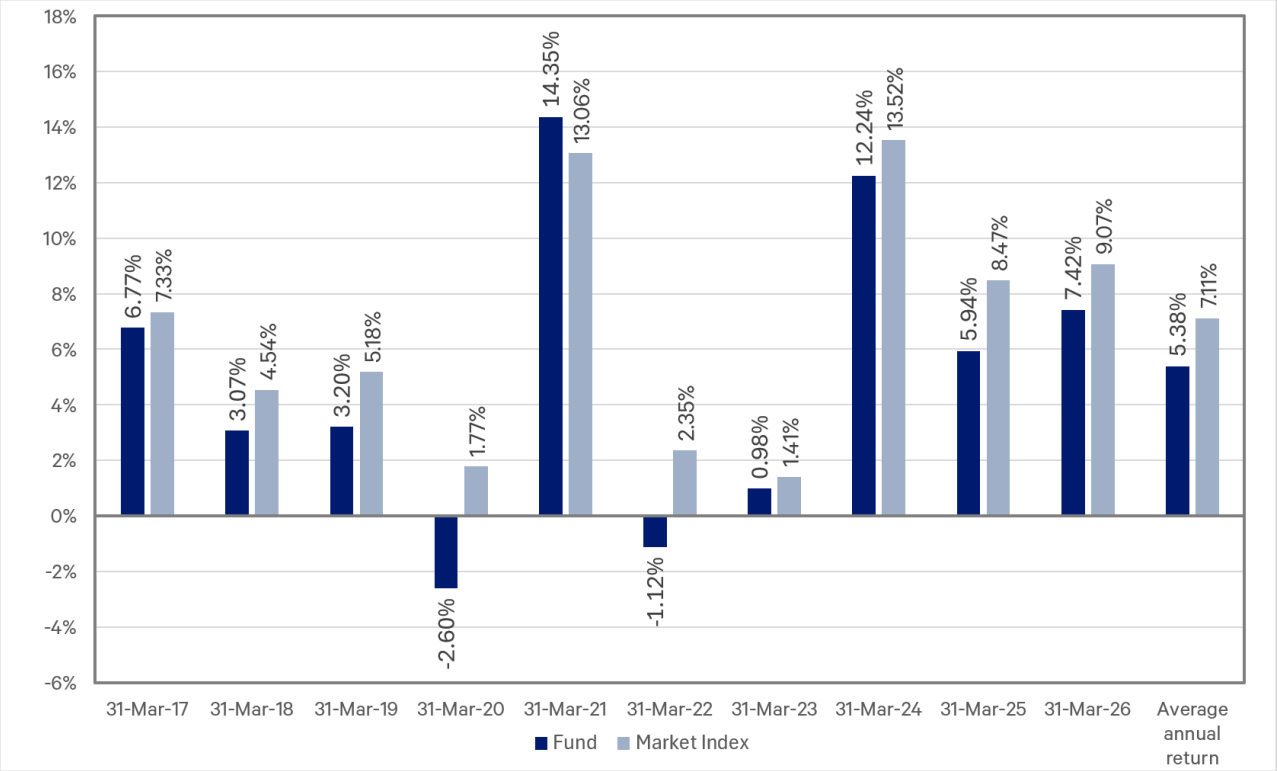

See the product disclosure statement (PDS) for more information about the risks associated with investing in this Fund.
