Organic Vessel Program, Connecting Argentine Agriculture with the World

WHERE EXCELLENCE AND COMMITMENT TO THE
ENVIRONMENT MERGE TO OFFER YOU THE BEST PRODUCTS.

A Purpose-Driven Project

BRO FOOD SUPPLIER is a company **more than a decade of experience**, founded with the mission of connecting argentinian organic farmers with the international market. From the beginning, the company has aimed to help producers adopt organic methods and tackle the challenges associated with this sustainable approach. Currently, our operations involve partnerships with **more than 18,000 hectares under certified organic standards**.

Founded by two agricultural engineers with expertise in agribusiness and organic farming, BRO has cultivated a robust network of local exporters and international buyers focusing on the commercialization of key products within organic rotations, such as soybeans, peanuts, flint corn, sesame, chia, sunflower and others.

10+

years of
experience

18,000+ ha

under certified organic standards

US & EU

destination markets

BRO FOOD SUPPLIER

Buyer of grains from organic producers, processor, and exporter of organic grains. Our focus is on integral sustainability, product quality, traceability, and organic compliance, working directly with Argentine producers.

XIAMERICA FOOD SUPPLIER

International trader and coordinator of the Vessel Program. We are responsible for port logistics, international freight, insurance, legal support, and commercial management.

“Integrated logistics, guaranteed quality, secure operations”

Our Bulk Vessel Program

We bring together farming, industry, and trade in one integrated supply program.

Our Bulk Vessel Program aims at maximizing logistics and commercial efficiency in the export of **organic and Non-GMO grains to the US and EU.**

The program is governed by a grain acceptance protocol requiring quality and documentary controls at every stage, ensuring a secure transaction.

Key Benefits:

On-time deliveries.

High-quality products with guaranteed traceability.

Diversified production regions that mitigate climate and quality risks.

“From the Argentine fields to the ports of the United States and Europe, we guarantee a solid, safe, and reliable program. Our commitment: to be the strategic partner of our clients in the supply of organic bulk grains.”

What we do

- 01** Support local producers in their certification and organic production processes.
- 02** Purchase organic soybeans, sunflower, flint corn, and canola from Argentine producers and exporters.
- 03** Process all grains to ensure quality, remove foreign materials, and comply with the U.S. and EU regulations.
- 04** Coordinate cargo from multiple exporters into the same vessel to maximize logistics efficiency.
- 05** Monitor quality throughout the chain: from the field to vessel loading.
- 06** Manage the entire chain: grain purchase, industrial processing, port reception, maritime logistics, and international insurance.

Our Products

NOP Organic Soybeans: our flagship since 2012.

NOP Flint Corn: experience in exports to Europe.

NOP Sunflower and Canola: production and export potential at scale.

Sustainable Crop Rotations, Quality, and Long-Term Commitment

What sets BRO apart from all competitors is its commitment to **sustainable agricultural practices and strict crop rotations**, ensuring the long-term ecological balance of the fields we work with. By implementing a strict quality monitoring and organic traceability plan, we ensure that every stage of production, processing, and export meets the highest industry standards, making us a reliable and responsible partner for both producers and buyers.

Thanks to this approach and strong partnerships, BRO FOOD SUPPLIER has become:

- 01 A top exporter of organic bulk vessel soybeans to the U.S.
- 02 Exporter of non gmo and organic bulk vessel of flint corn to the UE.
- 03 A key reference in Argentina for peanuts.
- 04 An emerging player in sesame, sunflower, and chia markets.

Building Trust, Delivering Quality, Expanding Global Reach.

Regulatory Compliance

- Strict compliance with USDA–NOP, FDA, and CBP requirements.
- Comprehensive documentation: Certificates of Analysis, Export and Traceability Docs.

Ensuring Quality and Full Traceability

- Quality control in the field, industry, port, and vessel.
- Independent surveyors and experts trained by BRO.
- Quality reports at every stage: noxious weeds, GMO, pesticides, and commercial quality.

Growing Network of Producers and Exporters

Certified producers:

we work hand-in-hand, providing technical support and connecting them with research institutions.

Allied exporters:

third-party exporters integrated into our quality control system.

Audit and control:

on-site visits, documentary verification, and continuous monitoring to ensure regulatory compliance.

Competitive Advantages

- Scale and logistics efficiency (full cargo).
- Contractual and financial security.
- Commercial flexibility.
- Proven experience in managing bulk vessel risks.

Integrated Logistics

- Coordination of inland transportation in Argentina.
- Port and storage services.
- Ocean freight and international insurance.
- Support through to final client reception in the U.S.

Our team

A multidisciplinary team specialized in every stage:

Agriculture & technical assistance.

Commercial quality & field surveyors.

Documentation & compliance.

Industry & inland logistics.

Legal & regulatory.

Commercial & client follow-up.

International trade.

General management.
