Leadership in Organic Agriculture and International Trade

WHERE EXCELLENCE AND COMMITMENT TO THE
ENVIRONMENT MERGE TO OFFER YOU THE BEST PRODUCTS.

A Purpose-Driven Project

BRO FOOD SUPPLIER is a company with **a decade of experience**, founded with the mission of connecting argentinian organic farmers with the international market. From the beginning, the company has aimed to help producers adopt organic methods and tackle the challenges associated with this sustainable approach. Currently, our operations involve partnerships with **more than 18,000 hectares under certified organic standards**.

Founded by two agricultural engineers with expertise in agribusiness and organic farming, BRO has cultivated a robust network of growers and international buyers focusing on the commercialization of key products within organic rotations, such as soybeans, peanuts, flint corn, sesame, chia, sunflower and others.

Sustainable Crop Rotations, Quality, and Long-Term Commitment

What sets BRO apart from all competitors is its commitment to sustainable agricultural practices and strict crop rotations, ensuring the long-term ecological balance of the fields we work with. By implementing a strict quality monitoring and organic traceability plan, we ensure that every stage of production, processing, and export meets the highest industry standards, making us **a reliable and responsible partner for both producers and buyers.**

Thanks to this approach and strong partnerships, BRO FOOD SUPPLIER has become:

- 01 A top exporter of organic bulk vessel soybeans to the U.S.
- 02 Exporter of non gmo and organic bulk vessel of flint corn to the UE.
- 03 A key reference in Argentina for peanuts.
- 04 An emerging player in sesame, sunflower, and chia markets.

Bridging Agriculture And Industry

Network of Organic Producers in Argentina:

Salta, Córdoba, La Pampa, Buenos Aires

Each of our processes is handled in a **specialized GFSI certified facility** in different locations of Argentina to ensure quality and efficiency.

High Oleic Peanuts

Our expertise began with high oleic peanuts, where we developed and established a sustainable and efficient production model in **Córdoba, Argentina's leading peanut-growing region**. Partnered with leading local industries, we work alongside expert teams and advanced technology to guarantee food safety and premium quality.

- **6.000 mt** yearly production capacity.
- Shelling, blanching and roasting processes and peanut butter.
- MAP Vacuum System.
- Digital traceability batch by batch.

We maintain strict organic crop rotations, ensuring sustainable soil management.

We have industrial and commercial solutions for all products, not only peanuts.

We offer certified organic peanuts from long-standing certified fields, guaranteeing both quality and sustainability.

We have obtained **NOP, LPO, Kosher and GFSI certifications** thanks to our commitment to quality, safety, and traceability at every stage of production.

Products & Packaging Solutions

BRO offers a wide range of peanut types, carefully selected and packaged to meet the specific demands of diverse international markets.
