Feel The Heath Benefits of Steam Therapy

Discover the transformative benefits of steam therapy. Combining soothing heat with modern wellness principles, regular steam use can help relax the body, calm the mind, and support overall wellbeing. From muscle recovery and improved circulation to deeper relaxation and healthier skin, steam offers a natural way to restore balance and elevate your daily wellness routine.

5 Tips For Optimised Steam Use

- Pre-Heat Your Steam Shower
- Optimal temperature: 43 degrees
- Enhance With Aromatherapy
- Use 3–4 Times Per Week
- Cool Shower After Use

Healthy Skin

- Heat opens pores and encourages cleansing through sweating, helping to leave skin looking clearer, smoother, and more radiant.

Circulation

- Heat exposure increases blood flow throughout the body, helping to deliver oxygen and nutrients more efficiently.

Stress Relief

- Steam sessions help calm the mind, reduce tension, and promote an overall sense of wellbeing.

Sleep Quality

- The relaxing effects of steam bathing can help you fall asleep faster and enjoy deeper, more restorative sleep.

Detoxification

- Increased perspiration helps the body naturally eliminate impurities, leaving you feeling refreshed and revitalised.

Muscle Recovery

- Deep, penetrating heat helps relax muscles, reduce stiffness, and support post-exercise recovery.

Respiratory Support

- The warm environment can help open airways and promote easier breathing, particularly during colder months.

Increased Vitality

- Step out feeling revitalised, with renewed energy, improved focus and a greater sense of overall wellbeing.

Sizing Guide

Generator Sizing Guide

STEP 1: BASE VOLUME CALCULATION (x)

Measure the Length x Height x Width (in meters) of your proposed steam room, then multiply by each other to determine (x) measurement.

STEP 2: TOTAL VOLUME CALCULATION (y)

- For Natural Stone or Marble, multiply (x) by 2.0 to determine (y) OR for Ceramic or Porcelain tile, multiply (x) by 1.6 to determine (y)
- Then for Exterior Walls and/or Glass Doors, multiply (y) by either 1.1 (for one), 1.2 (for two) or 1.3 (for three) and so on to determine your final (y) measurement.

STEP 3: SELECT YOUR GENERATOR

Using your final (y) measurement, determine which generator size is required using the parameters below.

- 4.5kW - for (y) measurements up to 3.5m³
- 6kW - for (y) measurements between 3.5m³ - 5.8m³
- 9kW - for (y) measurements up to 5.8m³ - 10.3m³
- 10.5kW - for (y) measurements up to 10.3m³ - 12.5m³
- 12kW - for (y) measurements up to 12.5m³ - 15.2m³

For larger configurations, please contact us to discuss potential options.

Use our sizing guide calculator tool found on steamist.co.uk if you require further assistance.

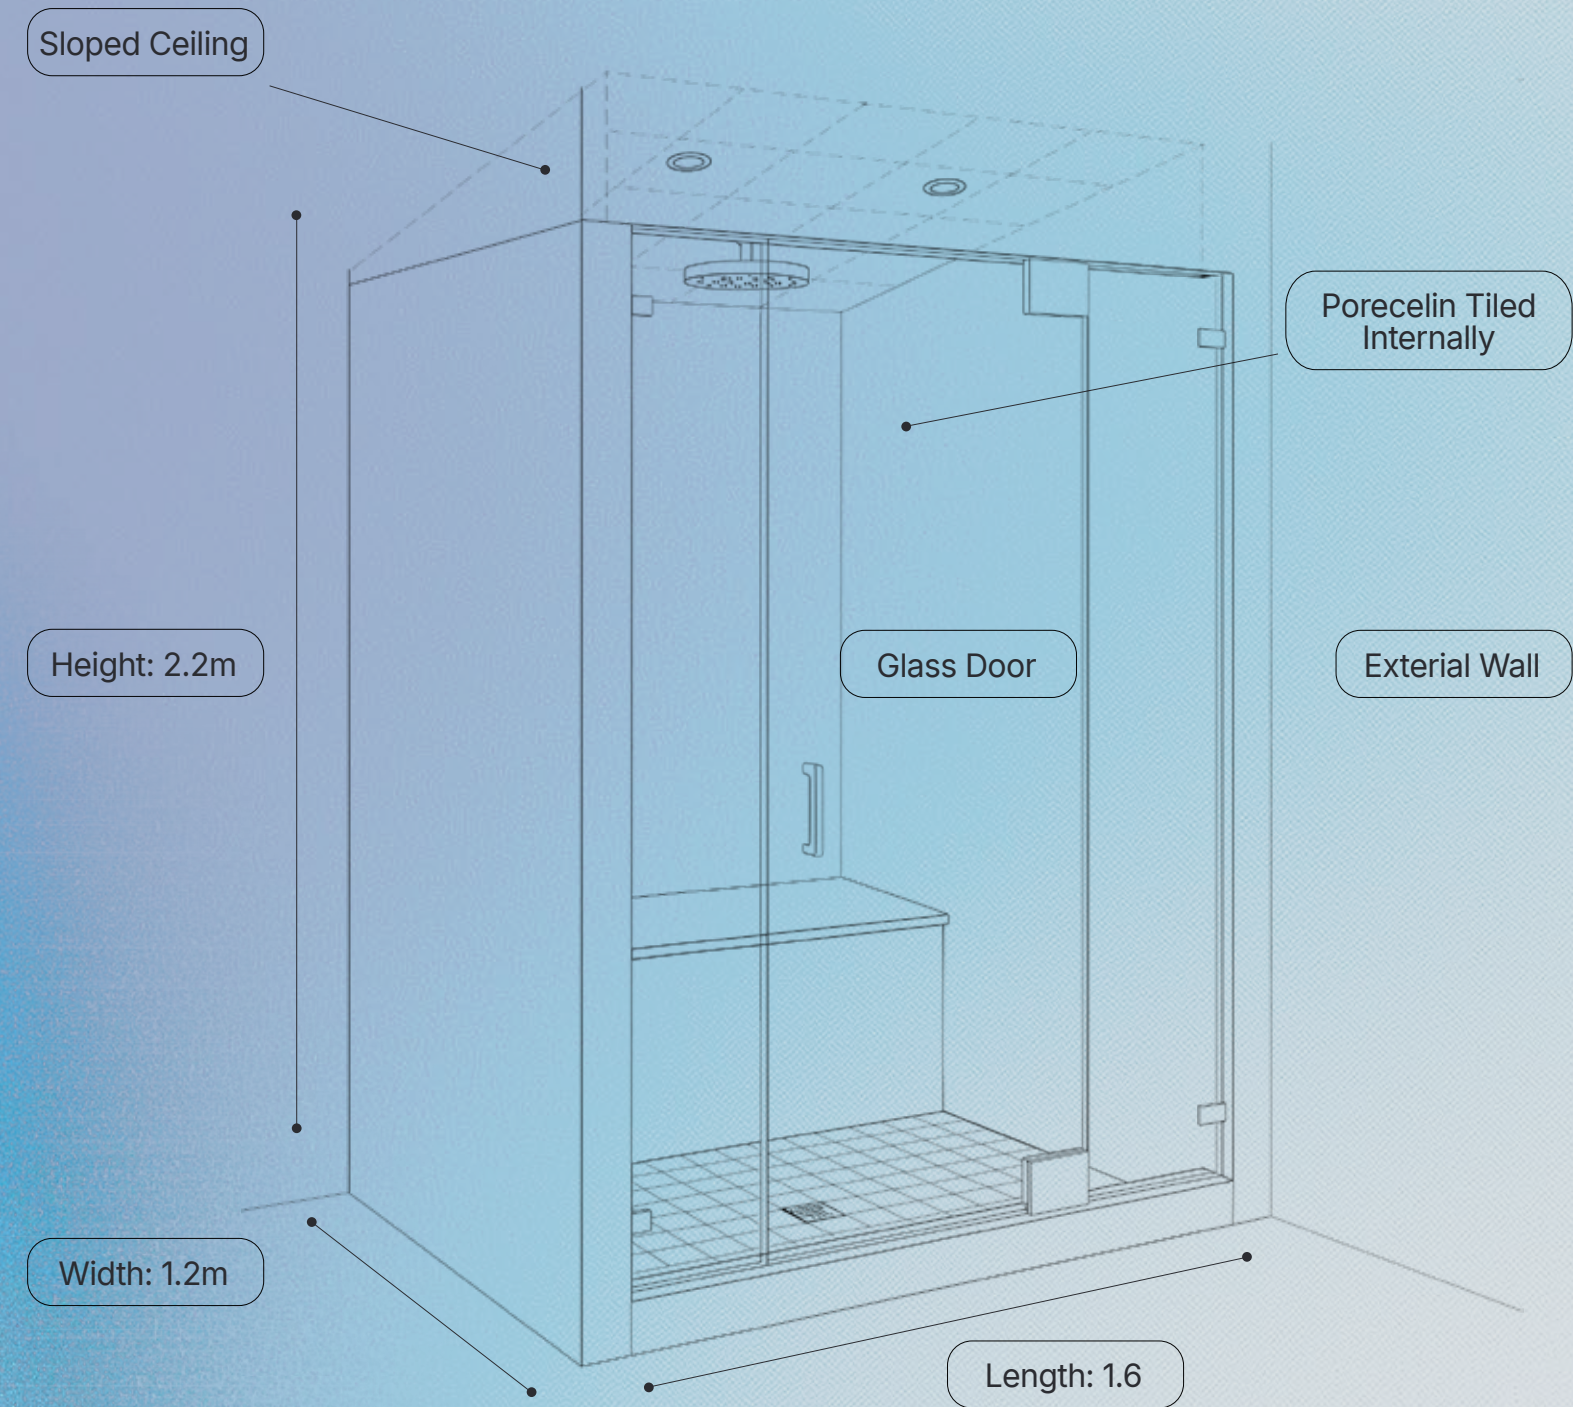

Sizing Guide

Example

- Using the sizing guide to work out the correct steam generator for this steam room.

This steam room measures 1.6m x 1.2m x 2.2m, this gives us a base volume of 4.22m³ (x) We're using porcelain tiles for the install (x1.6), which gives us a (y) measurement of 6.75m³. We have one exterior wall and a one glass door (x1.2), which gives us a total volume calculation of 8.1m³ (y)

Based on this outcome, the (y) volume would require us to install an 9kW Steam Generator as the room volume is in-between 5.8m³ – 10.3m³

Introducing Smart Steam Range

1. Smart Steam Generator

The heart of the system is the steam generator. The SMS compact size permits installation in a cupboard, closet, garage or insulated attic.

2. Steam Outlet

The SMS steam outlet delivers whisper-quiet performance with 360° steam dispersion. Ideal installation 300 – 400mm from finished floor away from user and control panel.

3. Smart Digital Control

Steamist Smart Control full touchscreen interface with advanced functionality connecting all Smart equipment together.
3A - Smart Hub. 4A - Remote Hub

4. Wireless Remote

Steamist Wireless remote allows to turn your shower on or off from outside your shower, this allows for your desired water temperature to be ready for when you step into the shower.

5. WIFI Control

WIFI functions allows you to connect your smart equipment to the Steamist SMART app or home automation including Alexa and google home.

Remote start and control your shower temperature and lighting from your mobile device.

6. Smart Digital Shower Valve

SMART Digital Shower valve
Featuring 1 – 4 outlets and precise
temperature control. Combine
Steam with Shower or Shower only
controlled by the Steamist Smart
Control.

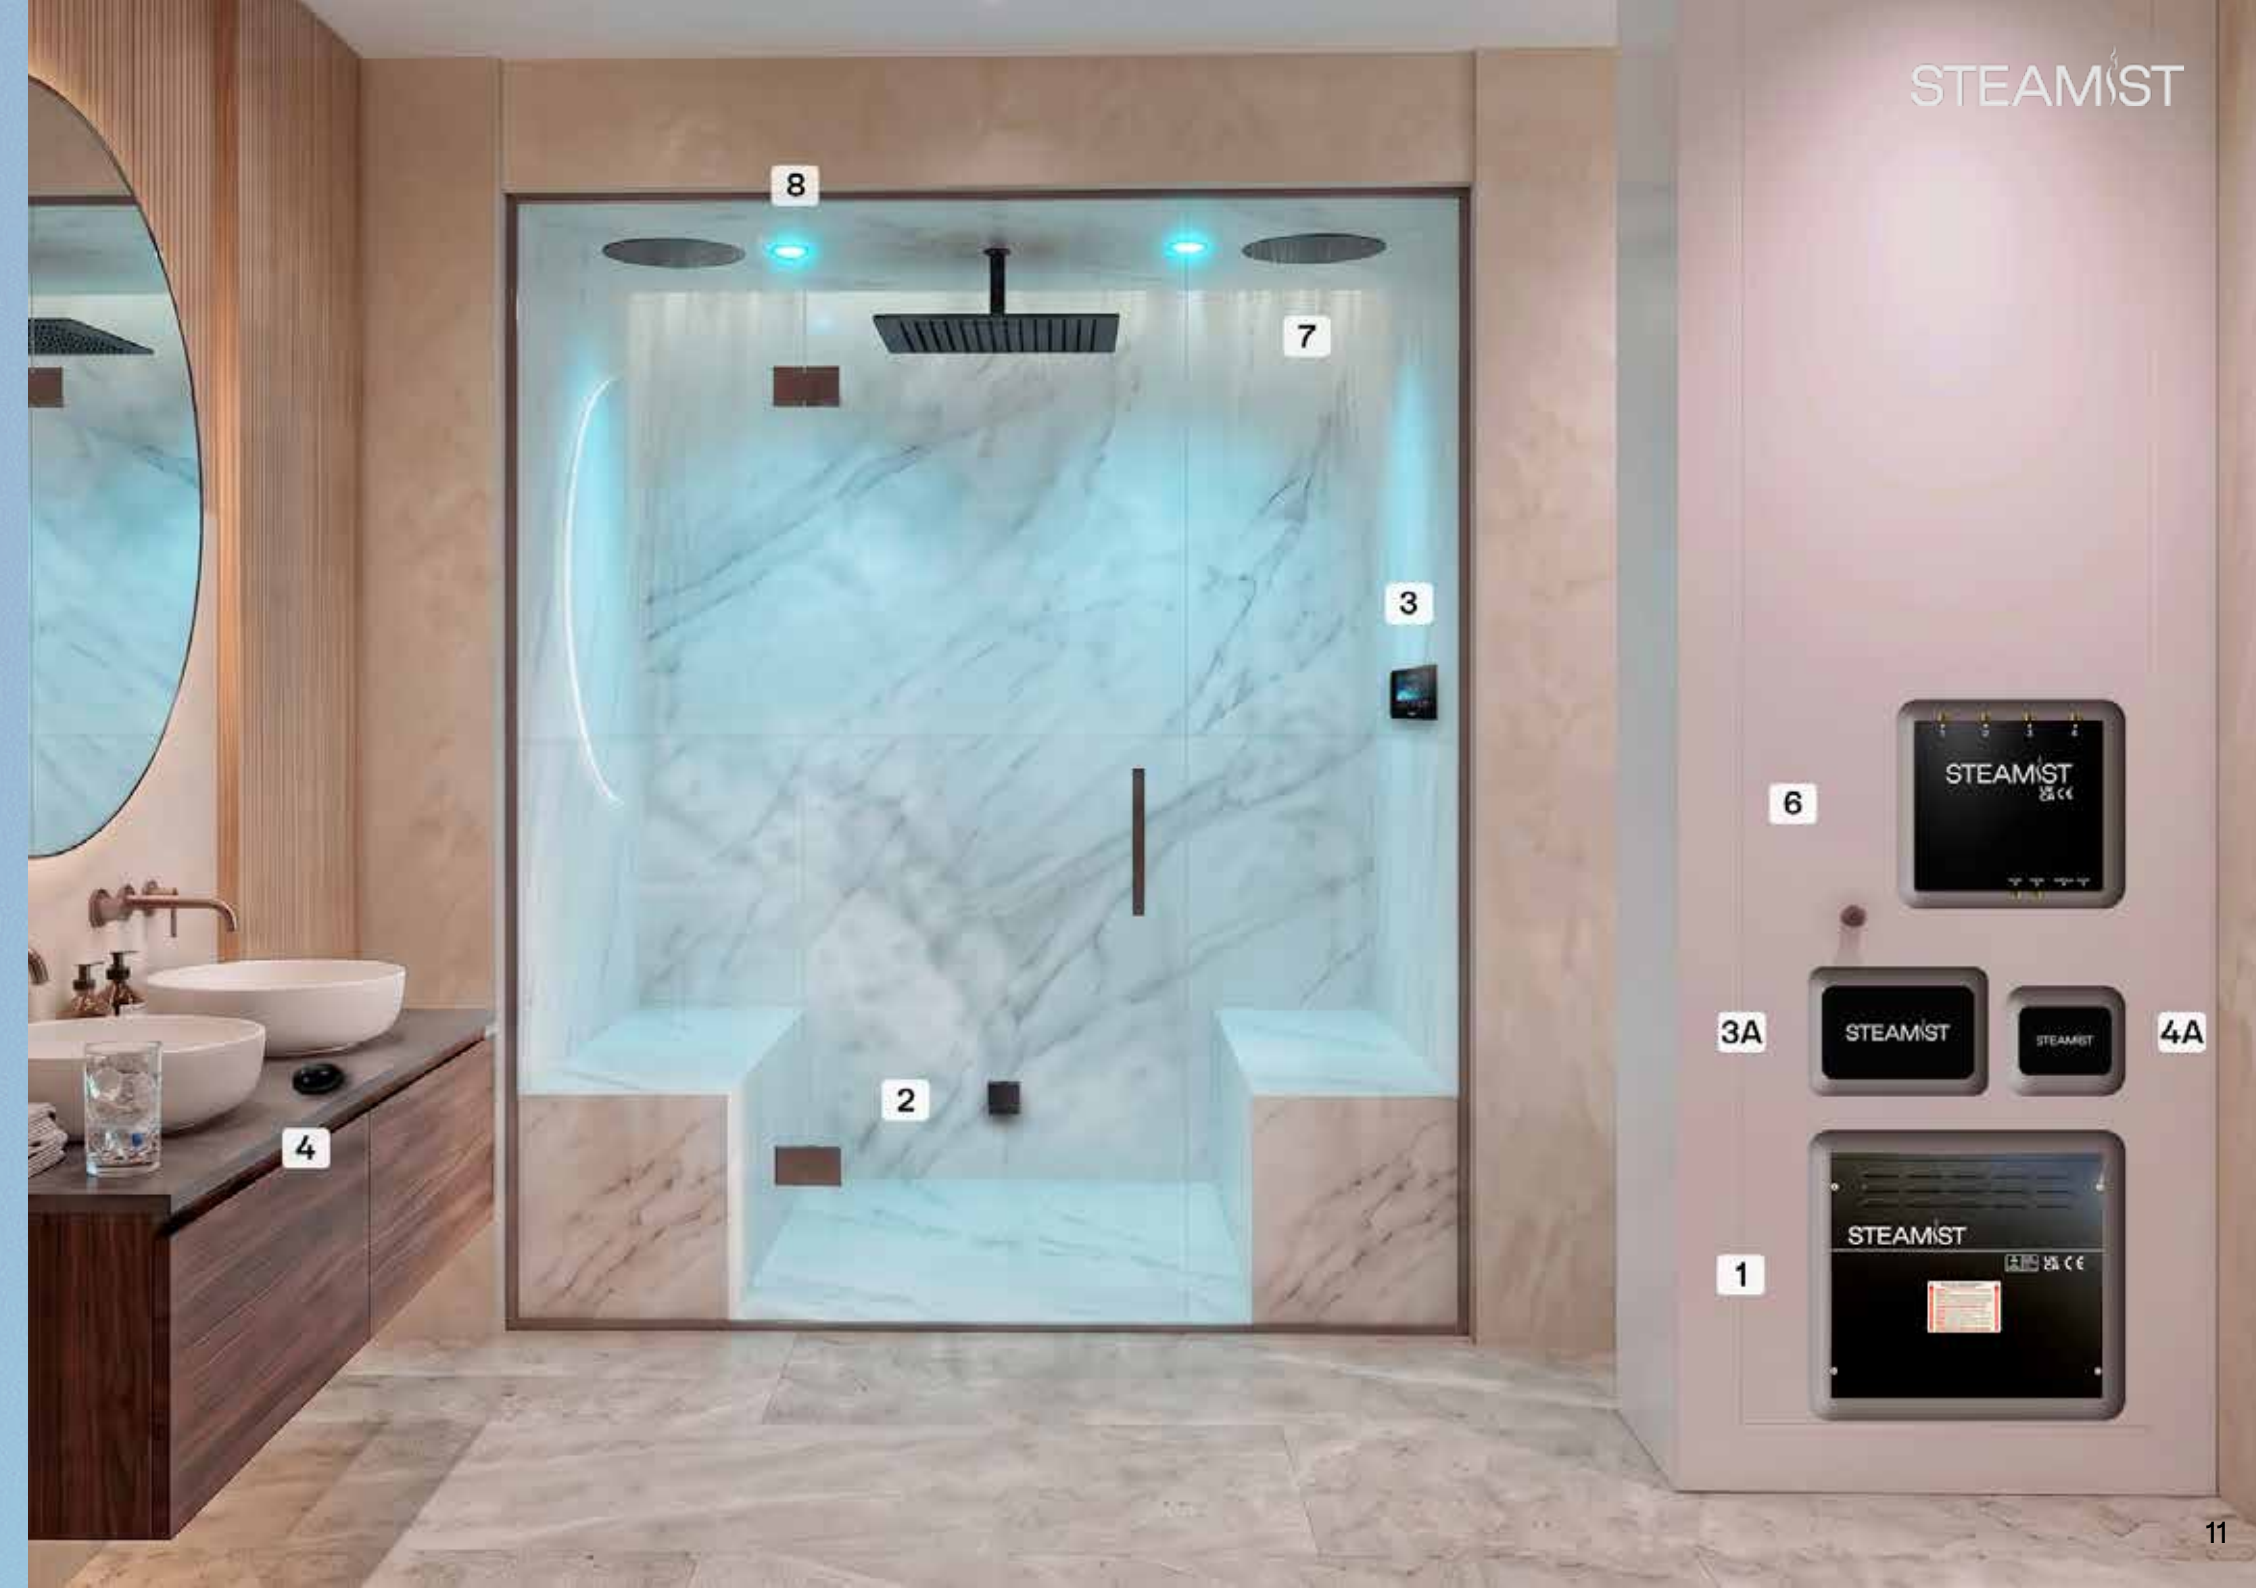

7. Speakers

Add speakers to allow you to play, pause, skip or increase the volume of your favourite music, podcast or audiobook from inside your shower via the Smart Control Panel.

8. ChromaTherapy Lighting

Enhance your shower or steam shower lighting with our Chromatherapy downlights. Select from white shower light or 6 Chroma Therapy light colours.

Steam Generator

The STEAMIST generator features an optional temperature sensor, allowing the digital controller to be installed either inside or outside the steam room for greater installation flexibility, particularly in smaller spaces. Every unit also includes automatic and manual drain functions as standard, making descaling simple and helping to maximise the generator's longevity and performance.

- 5 Year Warranty
- Compact Design
- Quiet Operation
- Suitable for Any Size Bathroom
- Quick Start: Steam In 2 Mins
- Split-Tank for Continuous Steam
- Auto-Drain
- Descale Function

Smart Shower

Shower Features

With 1 to 4 Outlets the Steamist Smart Shower is Suitable for every shower or bath needs.
(Shower Outlet Brassware not included)

Why not convert your shower into a steam shower? See page 28-29 for steam shower packages.

Reasons To Choose STEAMIST Smart Shower

Smart Control Panel

Steamist Smart Control panel allows the user to easily control their shower at the touch of your fingertips as well as music and lighting.

Steam Options

Transform your shower by adding a steam generator to your Smart Shower for home spa-like experience.

Energy Efficiency

Steamist Smart Shower valve is designed for energy efficiency with flow control to suit all installations.

Flexibility

Steamist Smart Shower has 1 to 4 outlets to suit all shower or bath requirements. Choose from 6 different outlet icons from shower outlets to bath spout.

Precise Temp Control

The Steamist Smart Digital Shower lets you to set and maintain your ideal water temperature with exact precision. This guarantees a comfortable, consistent showering experience every single time, eliminating the risk of sudden, uncomfortable temperature fluctuations.

WIFI

WIFI functions allows you to connect your smart shower to the Steamist SMART app or home automation including Alexa and Google home.

Remote start and control your shower temperature and lighting from your mobile device

Music

Music feature allows you to play, pause, skip or increase the volume of your favourite songs from inside your shower via the Smart Control Panel.

Lighting

Light feature allows you to customise your shower lighting from white shower light or 6 Chroma Therapy light colours.

Wireless Remote

STEAMIST Wireless remote allows to turn your shower on or off from outside your shower, this allows for your desired water temperature to be ready for when you step into the shower.

Music

Transform Every Session Through Sound.

Music Features

With Our Smart Control, you can enjoy your favourite music in your shower or steam shower from any Bluetooth enabled music device.

Speakers sold separately

Music has the power to transform how we feel, making it an essential part of the modern wellness experience. With integrated music control built directly into the STEAMIST Smart Steam and Smart Sauna systems, you can create the perfect atmosphere for every session, whether you're seeking deep relaxation, mental clarity, or a revitalising boost of energy.

Effortlessly control your audio directly from the Smart Controller or through the STEAMIST App. Stream your favourite playlists, calming soundscapes, meditation tracks, or energising music with intuitive controls designed to work seamlessly alongside your steam or sauna settings.

Introducing SMS Steam Range

SMS • Steam Controller

Enhance your steam room experience with our cutting-edge touch screen controller.

Effortlessly adjust the temperature, duration and steam intensity to your exact preferences, ensuring tailored relaxation every time. Not only does our controller offer precise control over these essential features, it also features light control and the ability to use the drain down function. This helps with any potential scale build up inside the generator.

- Digital Touch Screen Control Pad
- Adjustable Steam Temp Control
- Adjustable Steam Duration Control
- White Light Function – SMS-LIGHTWH Sold separately
- Automatic Descale Function
- Can Be Installed Inside Or Outside The Steam Room
- Cannot operate SMART products

If control is installed outside the steam room or too close to steam outlet the provided temperature sensor is required.

Control Options Comparison

SMS Control

SAUNA

Feel The Heath Benefits of Sauna Therapy

Discover the transformative benefits of sauna therapy. Combining soothing heat with modern wellness principles, regular sauna use can help relax the body, calm the mind, and support overall wellbeing. From muscle recovery and improved circulation to deeper relaxation and healthier skin, a sauna offers a natural way to restore balance and elevate your daily wellness routine.

5 Tips For Optimised SAUNA Use

- 10 – 20 Minute Sessions
- Hydrate Before & After
- Remove Jewellery
- Use 3–4 Times Per Week
- Cool Shower After Use

Healthy Skin

- Heat opens pores and encourages cleansing through perspiring, helping to leave skin looking clearer, smoother, and more radiant.

Circulation

- Heat exposure increases blood flow throughout the body, helping to deliver oxygen and nutrients more efficiently.

Stress Relief

- Sauna sessions help calm the mind, reduce tension, and promote an overall sense of wellbeing.

Sleep Quality

- The relaxing effects of sauna bathing can help you fall asleep faster and enjoy deeper, restorative sleep.

Detoxification

- Increased perspiration helps the body naturally eliminate impurities while leaving you feeling refreshed and revitalised.

Muscle Recovery

- Deep, penetrating heat helps relax muscles, reduce stiffness, and support post-exercise recovery.

Respiratory Support

- The warm environment can help open airways and promote easier breathing, particularly during colder months.

Increased Vitality

- Step out feeling revitalised, with renewed energy, improved focus, and a greater sense of overall wellbeing.

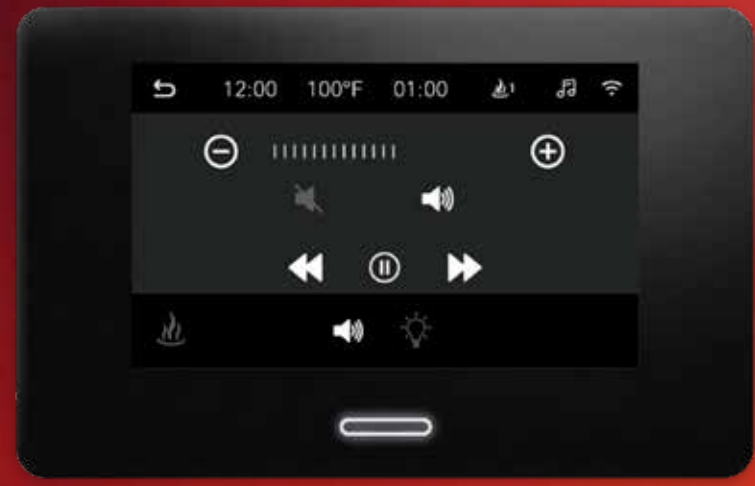

Smart Sauna Control

Smart Sauna Control

Advanced Control for the Modern Sauna Experience.

Compatible with Google Home, Amazon Alexa, Siri, and Apple HomeKit, the system also supports voice control for a truly connected experience. Combined with integrated music and lighting control, the STEAMIST Smart Sauna Control transforms traditional sauna bathing into a fully personalised, intelligent wellness journey.

Engineered for simplicity and designed for luxury, it represents the next generation of sauna technology, where innovation, comfort, and wellbeing work seamlessly together.

Designed to bring effortless convenience to every sauna session, the STEAMIST Smart Sauna Control combines advanced technology with intuitive operation. Featuring a sleek full-touch digital interface, the controller allows you to precisely manage temperature, lighting, music, and user preferences from a single elegant display. Built for modern lifestyles, the system offers dual user profiles, allowing multiple users to save and instantly recall their preferred sauna settings. Whether you prefer an energising morning session or a relaxing evening retreat, your ideal wellness environment is always just a touch away. Seamlessly

connected through WiFi, the Smart Sauna Control integrates with the STEAMIST App, enabling remote operation directly from your smartphone. Preheat your sauna, adjust settings, or monitor your session from anywhere, ensuring your perfect wellness experience is ready whenever you are.

FAQ’S

What makes a Steamist Steam Shower an “Attainable Luxury?”

If you think adding a steam shower to your home is a major remodelling project, you may want to reconsider. The compact steam generator can fit inside a typical vanity cabinet, and the plumbing & electrical connections are simple for your professional installer. In many cases your installer can convert a shower into a steam shower by enclosing the door so steam does not escape from above.

How should I choose the correct sized Generator?

Please refer to page 8 sizing guide to calculate the correct sized steam generator or our steam generator calculator on our website.

What about maintenance?

The Steamist system is virtually maintenance-free, and is covered by a 5-year warranty. However, the SMS Generator has a descaling feature in which you can add citric acid to break down any scale in the generator.

Can I use aromatherapy products in my steam shower?

Yes. The Steamist 3199 Steamhead has an “Aroma well” on the top. This allows you to apply a couple of drops of essential oils in it. This is a wonderful enhancement to the steam experience. However, do not apply oils on the steam head while steam is being emitted from the head as there is possibility for injury due to burning. Caution: Steam is 212°F, in other words, steam is HOT!

I have very hard water. Is there anything that I need to do to protect my steam unit?

You may want to consider a whole house water treatment system if the water quality is a concern. The Steamist steam generator can operate in conjunction with a water softener. It is important to realise that good water is a condition which is desirable for drinking as well as protecting the plumbing systems, decorative hardware, faucets and glass from the negative effects of hard water. Additionally, the SMS Generator has a descaling feature in which you can add citric acid to breakdown any scale in the generator.

Do I need an extraction fan in the steam shower enclosure?

No. After a steam bath take a hot or cold shower and the steam condenses into the drain. However, we would recommend putting a good in-line extraction fan in the bathroom outside the steam room.

What do I need to install a Steamist Steam Generator in my house?

The installation requirements are relatively simple with connections similar to that of a Hot Water Heater with 240 Volt Electricity and a cold (or hot) Water Supply to the unit. A steam line to the bathing area and a Glass Steam enclosure is all that is necessary to complete the installation

Does the steam generator take up any usable bathroom space?

No. The unit is compact in size and can be installed preferably 6m meters away but can be further. (Extension cable would need to be purchase)

FAQ’S

Is the steam generator easy to operate?

Yes. Steamist Digital Steam Shower Control can be inside (or outside) the steam shower make it both convenient and very comfortable to relax and enjoy the steam experience.

Where is the best place to put a steam control and outlet?

Ideally you would want to place the control close to wear you would sit and the steam outlet as far away from the control so the control can read the most accurate room temperature.

Can I have an electric shower inside the steam room?

No, you cannot have an electric shower in a steam room. Add our SMART-SHOWER digital shower valve to your steam shower or concealed shower valve.

What’s the difference between a Steam Shower and a Sauna?

Both steam and sauna systems provide similar benefits for your mental and physical well-being. The difference between a steam shower and a sauna is basically “wet heat” versus “dry heat”. Sauna room temperatures may actually be higher, but you may “feel the heat” more by adding steam. It really comes down to personal preference. A steam shower system, however, can generally be more easily integrated into an existing bathroom or new home plan at lower cost.

Can I use my preferred brassware companies’ brassware to the Steamist SMART-SHOWER?

Yes we just provided the digital shower valve, depending on your set up you can use your preferred shower outlet options for example overhead rainfall shower and Handheld shower.

Can I remotely start from Steam, Shower or Sauna products?

Yes, with the Steamist SMART App you can start your Steamist devices, change temperature and duration. Or once set up why not ask Alexa “Turn on my steam shower”

Do Saunas require ventilation inside?

Yes, saunas require a supply air vent below or next to the sauna heater and then an exhaust air vent the other side of the room to the heater.

Can Steamist sauna cabins plug into a 3-pin socket?

No, all saunas and steam generators require a dedicated power supply. Please confirm with a certified electrician.

What is the difference between stove sauna and infrared sauna?

Traditional stove saunas use heaters with stones to heat the air around you to high temperatures (70°C to 110°C), while infrared saunas use radiant light waves to directly penetrate and warm your body at much lower temperatures (50°C to 60°C)
