

CASE TV620B
COMPACT TRACK LOADER

POWER AND PERFORMANCE

The 114-horsepower CASE TV620B sets the bar for power and performance in a compact track loader.

OVERVIEW

- Rated operating capacity — 6,200 pounds
- Breakout force — 12,907 pounds bucket and 12,084 pounds lift
- Track length on the ground — 74 inches

CASE TV620B COMPACT TRACK LOADER

With this much power and performance, we're also providing more standard features than ever before.

ELECTROHYDRAULIC CONTROLS

Easily set total machine responsiveness to low, moderate or aggressive. Independently set tilt, lift and drive speed, as well as loader arm and drive control, to best meet the demands of the job.

HIGH-FLOW HYDRAULICS

41.6 gallons per minute at 3,450 psi and 83.7 hydraulic horsepower. Plus, the "Hydraulics on Demand" feature allows you to dial in hydraulic flow specifically to the level you need.

LOAD HIGH, REACH DEEP

With a maximum dump height of 39 inches and with a 140.2-inch hinge pin height, you can efficiently load larger, high-sided trucks.

COOL AND CLEAN

A hydraulically reversing fan minimizes debris buildup in the engine. The emissions control technology does not have a diesel particulate filter and no need for regeneration, which means no filter service nor unnecessary downtime.

EASY OWNERSHIP

All critical checks and service points are grouped at the rear of the machine for easy access, and an 8-inch LCD multifunction display provides you with real-time data on machine operation and performance. With one year of our proprietary telematics, you get great insight into the loader's operation and performance.
