assets, materials
and people.

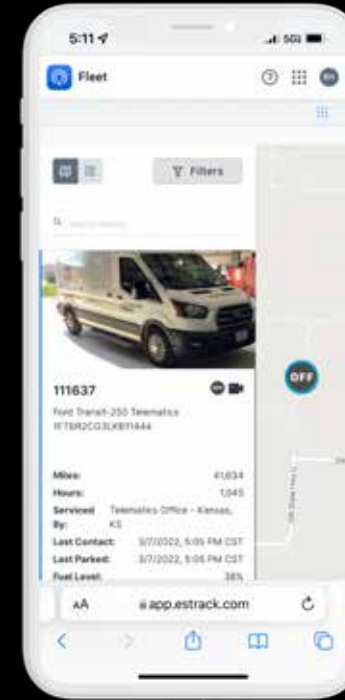

Everything in One Place

It's finally possible to manage your assets, people and materials all in one place with T3, the OS for construction. T3 is a cloud-connected technology platform with apps that help your company monitor, track and manage its everyday operations – from work done on the jobsite, to drivers on the road, repairs in the service bay and accounting in the back office. Easily communicate changes with your team. Streamline workflows for better efficiency.

Quickly access the data you need to make better business decisions. Replace the multiple systems, spreadsheets and ledgers you use now with **one centralized solution**. You can do it all with T3.

"T3 tracks equipment utilization, trip tracking and more in one place, rather than 6 or 7 places, to save us time and manual entry."

What T3 Can Do

T3 provides visibility, which translates into safer, more secure and more efficient overall operations.

- GPS tracking & geofencing
- T3 Dash Cams for vehicles and cabbed equipment
- Employee time & task tracking
- Preventive maintenance scheduling
- Streamlined repair work planning
- Reporting & analysis tools
- Internal rentals & financial utilization management
- Driver compliance & safety
- Parts & inventory management

All the Data You Need in One Place

T3's apps monitor the constantly moving pieces of your projects and provide powerful insights to help you make better business decisions.

Fleet

Advanced construction telematics that connect over the road and off highway, as well as tools and machines. AI-Equipped T3 Dash Cams with facial recognition* help you safeguard your fleet.

Work Orders

Streamline service and communications for your machines. Go digital to reduce diagnostic time and cut down on downtime. Get equipment back to work faster.

RentOps

Deploy machines with a simple, yet intelligent workflow. See how each one impacts your business. Schedule pickups, drop-offs and transfers to maximize utilization. Make intelligent choices about equipment ownership and rental.

Analytics

Pull all data points from the jobsite and construction workflows to develop user-friendly reports. Make data-empowered decisions with digestible information.

Time Cards

Manage schedules and overtime, as well as increase overall team productivity to restore visibility to your jobsite. Tie your team's time to tasks such as work orders and hauling equipment on the road, which can also help you bill accurately for labor time.

Inventory

Plan for jobs and proactively manage your inventory. Stay ahead of your customers' needs by streamlining intake and parts order workflows with a complete inventory view.

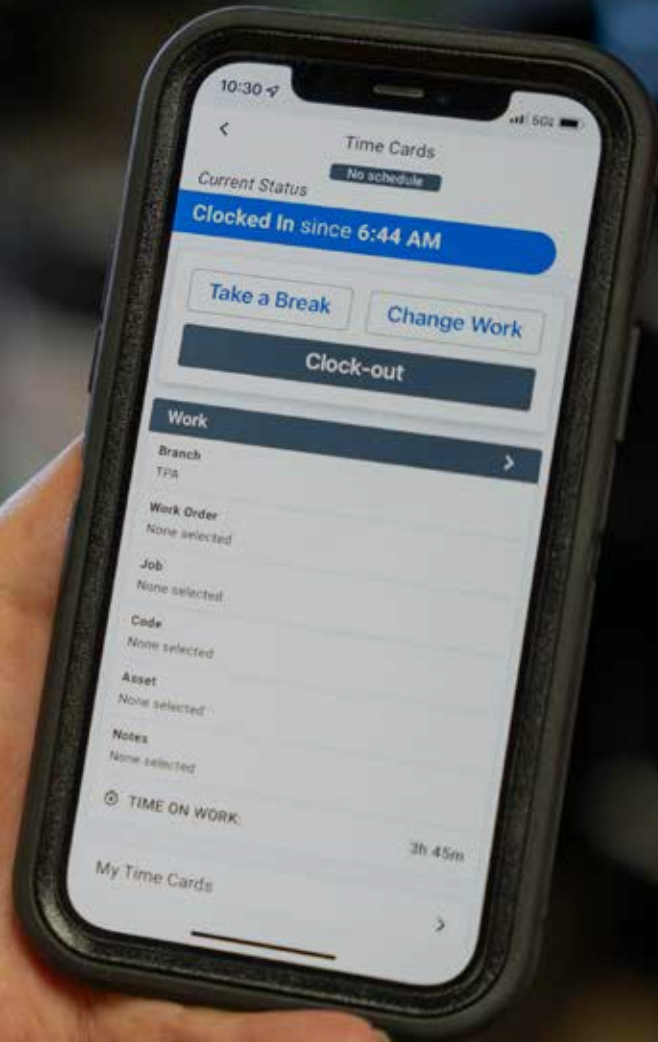

E-Logs

Meet ELD compliance while ensuring drivers are safe on the road through on-demand and accessible digital reports. Drivers can also submit DVIRs to report maintenance issues.

Inside the T3 Apps

Manage your assets, people and materials with the T3 suite of apps. Durable OEM-agnostic hardware for machines, vehicles and implements and T3 Dash Cams for vehicles and cabled equipment communicate with T3's cloud-connected apps to give your team easy access to necessary information from their mobile devices or computers. Explore what T3's apps look like.

Job, meet sight.

T3 helps thousands of contractors gain visibility into their operations so they can achieve more at the jobsite and save money and time.

"T3 saves us a few days each month by pulling reports that were otherwise done by hand and tracked by email and phone."

/

– Utility contractor in Idaho with 42 T3 users

"We save 15 hours a month using T3 to track our machines and assets."

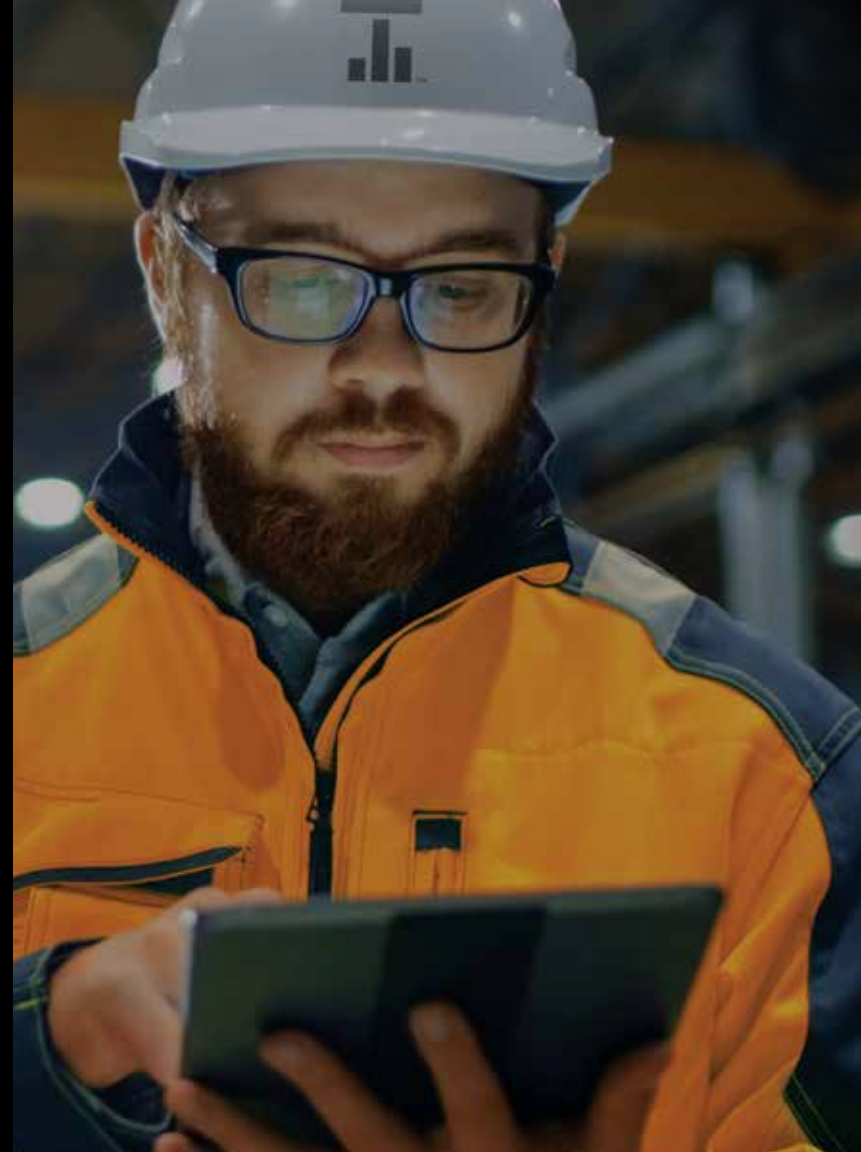

/

– General contractor in Missouri with 25+ T3 users

"T3 saves us around 60 hours a month."

/

– Fire protection systems and installation company in Louisiana with four users

Our technology powers connectivity to help you build with control.

- Identify and resolve bottlenecks.
- Master fleet maintenance and avoid preventable machine breakdowns.
- Connect expenses to profit centers.
- View and share detailed, real-time reports on labor, materials, maintenance and more.
- Improve communication between jobsite, workshop and office.

With T3, you can gain control over your entire construction, utility, paving and contracting operations. Learn more at T3.tech.
