

# Professional HydraGlow Rejuvenation Facial

## a Revitalizing Experience for Dehydrated Skin

**Service Time:** 60/85 Minutes.

- Objective:** Ideal for individuals with dry, flaky, dehydrated, or mature skin seeking improved environmental protection. Particularly beneficial for clients showing early signs of fine lines and wrinkles.
- Indications:** Suitable for those with dry, flaky, dehydrated, or mature skin looking for enhanced environmental protection. Recommended for clients worried about the initial indications of fine lines and wrinkles.
- Contraindications:** Generally suitable for most skin types; however, not recommended for individuals with severe skin irritations or those with aggressive or highly active acne conditions.

### Treatment Steps

- 1** Begin by removing eye makeup using PureGlow Aloe & Cucumber Makeup Remover applied to a cotton pad. Preheat the facial steamer.

---

  - 2** While gently steaming the skin, cleanse the face, neck, shoulders, and décolleté with LuminActive RX Cleanser (warm it between palms before applying). Use ample tepid water during this step and remove with damp sponges.

---

  - 3** Tone the skin using Aqualush Hydrating Toner.

---

  - 4** Exfoliate the skin using LuxyGlowPeel according to instructions. Leave on for 10 minutes, with or without steam.

---

  - 5** Massage the peel lightly with fingertips

---

  - 6** You can use the Beauty Ultrasonic Spatula to gently remove the peel. Afterward, thoroughly remove the enzyme with damp sponges; follow with Aqualush Hydrating Toner.

---

  - 7** Use another second peel, TropicDream Enzyme; apply it evenly to the face and leave it on for an additional 5 minutes under light steam.

---

  - 8** You can use the Beauty Ultrasonic Spatula to gently remove the peel. Afterward, thoroughly remove the enzyme with damp sponges; follow with Aqualush Hydrating Toner.

---

  - 9**
    1. If the client requires light extraction, apply Desincrustation Gel with a brush in a thin layer to the face and, if necessary, the neck for future extractions. Apply steam for 10 minutes to soften plugs and liquefy sebum. Remove with warm damp sponges.
    2. After extraction, use antibacterial Clarifying Salicylic Toner to disinfect the extraction area.
    3. Following that, apply the Kaolin Mineral Purifying Mask for 10 minutes. Afterward, continue with the facial protocol.

---

  - 10** Perform a light massage with 3 pumps each of Herbal Fountain Hydration Serum and Aquatic Resilience Serum (mix them in a 1:1 ratio in a glass bowl). You can enhance penetration and maximize facial benefits by using beauty machines like ultrasound, RF, oxygen, or lifting devices with low frequency. If the serums are penetrating too quickly, and you need to maintain a smooth flow of massage, you can add the Aqualush Hydrating Toner to your palms. This will enable you to continue the massage for a longer duration, and the same technique can be applied with a beauty device.

---

  - 11** Apply the AquaBliss Mask to the face and neck, leaving it on for 15 minutes. Perform a neck and shoulder massage for the first 5 minutes. Cover the eyes with a soft cover and let the mask enhance the beauty of your client's skin. Check client comfort before leaving the room, and dim the lights.

---

  - 12** Gently remove the mask with wet, warm, soft towels.

---

  - 13** Follow with Aqualush Hydrating Toner.

---

  - 14** On a cotton pad to remove all traces of the mask.

---

  - 15** Apply a mixture of Aquatic Resilience Serum and Grape Embrace Nourish Liposome Cream to the face and neck using massage flow movements and light pressure.

---

  - 16** Apply Hibiscus Kakadu Eye Elixir sparingly to the eye contours.

---
- End of Treatment.
