

ONVIF Engineer's Quick Reference

What ONVIF standardizes, how a camera is discovered, the seven profiles, and the pre-purchase checks that keep a multi-vendor system honest.

Profile	What it standardizes	Side	Note
S	Basic video streaming, PTZ, audio in	Video	Original (2012). Deprecating: last conformance submissions 2027-03-31.
T	Advanced streaming: H.264/H.265, imaging, motion & tamper events, metadata, two-way audio	Video	The 2026 baseline for IP video. Successor to S.
G	Recording configuration, search, replay	Video	Manage / pull back video stored on the camera (edge).
M	Metadata & events for analytics (objects, faces, plates, geolocation; via stream, events, MQTT)	Video	The interface for results, not the analytics accuracy.
A / C / D	Access control: configuration (A), door control & events (C), peripherals (D)	Access	Use only when access control is in scope.

How a VMS finds a camera (WS-Discovery)

Multicast over UDP 3702 to 239.255.255.250. Camera sends Hello; VMS sends Probe; camera replies ProbeMatch with its service address (XAddr). Multicast is link-local -- across a subnet or VLAN, add cameras by IP / IP-range, not discovery. Authenticate with WS-UsernameToken (hashed password digest, never plain text); discovery is not access.

The standards boundary -- conformant is not fully featured

ONVIF guarantees a baseline: discovery, stream setup, PTZ, events, the metadata interface. The actual video leaves over RTSP/RTP, not over SOAP. Vendor-specific features -- proprietary analytics, advanced motion zones, camera AI parameters -- usually need the manufacturer SDK (Axis VAPIX, Hikvision ISAPI, Dahua SDK), because the standard treats them as conditional / proprietary.

Before you buy: five conformance checks

Check	Why it matters
Is it on the ONVIF registry?	'Supports ONVIF' on a box can be a partial implementation. Verify the model on onvif.org/conformant-products .
Which profile(s), device AND client?	Conformance is two-sided. A Profile T camera with a Profile S client gets you only S. Match both ends.
Does my key feature travel over ONVIF?	If the project depends on a specific analytic or setting, confirm it is in-profile -- or plan the vendor SDK path.
Did you stage a real connection test?	Test discovery, auth, stream, and events against your actual VMS before committing to volume.
Are default credentials changed?	ONVIF leaves security to you. Factory-default passwords are a documented hole, not a convenience.

Ports: WS-Discovery UDP 3702. RTSP TCP 554. Sources: ONVIF Profiles & Core Specification; OASIS WS-Discovery 1.1; IETF RFC 2326 (RTSP). ONVIF: 7 active profiles, 33,000+ conformant products (2026).

GO DEEPER · THE 7-VOLUME HANDBOOK

Fora Soft Video Engineering Handbook

Seven volumes, 9,000+ pages: encoding, streaming, audio and AI for video products — from the pixel to production.

By Nikolay Sapunov, CEO at Fora Soft · Kindle & paperback on Amazon

[Browse the handbook on Amazon →](#)

This reference covers what ONVIF standardizes, how a VMS finds a camera, the seven profiles and the checks before you buy. Our seven-volume handbook covers the video stack around ONVIF: start with Volume 2 for network transport, multicast and NAT, then Volume 1 for H.264 and H.265 streams and Volume 6 for the analytics that feed Profile M.

WHAT YOU WILL FIND INSIDE

- Network transport, multicast and NAT traversal
- RTP delivery and latency budgets
- H.264 and H.265 profiles in camera streams
- Analytics metadata from computer vision

THE FULL HANDBOOK · 7 VOLUMES · 9,000+ PAGES · ALL ON AMAZON

Vol. 1 · Video Encoding — pixels and color to H.264, HEVC, AV1, quality metrics and AI

Vol. 2 · Video Streaming I — network transport, contribution and ingest, HLS, MPEG-DASH, CMAF

Vol. 3 · Video Streaming II — ABR, CDNs, players, WebRTC, DRM and the economics of delivery

Vol. 4 · Audio for Video I — PCM, codecs, loudness, accessibility, real-time voice processing

Vol. 5 · Audio for Video II — jitter buffers, lip sync, Atmos, quality metrics, neural codecs

Vol. 6 · AI for Video I — models and inference, computer vision, speech, search, generative video

Vol. 7 · AI for Video II — real-time pipelines, agents, serving, cost, compliance, verticals

Integrating cameras from several vendors into one VMS?

We will test discovery, streaming, events and auth against your camera list and tell you which features need vendor SDKs. 250+ video products shipped since 2005.
