

Kantox solutions for a leading UK clothing & homeware company

The company is a listed UK retailer with international sales and purchases. FX is managed centrally, with a range of hedging programmes run manually to cover risk across its various business lines. The company was looking to improve the quality of its exposure data and the precision of its hedging while removing time-consuming manual processes.

Kantox Dynamic Hedging®, Currency Management Automation software for end-to-end FX automation

FX CHALLENGES

The reliance on manual processes meant that real-time purchase data was not updated in forecasts. As a result, hedging was undertaken based on outdated information.

The complexities involved in **gathering exposure data and continuously monitoring currency markets** made it challenging to take advantage of positive market movements in a systematic, unbiased way.

Traditional forecast hedging necessitated significant unwinding throughout the year, with a heavy P&L impact.

KANTOX SOLUTIONS

Kantox Dynamic Hedging® is a rules-based currency management automation solution capable of combining a layered hedging programme with real-time updates based on live SO/PO data.

Kantox solutions allow the company **to automate the different phases of the FX workflow: pre-trade, trade and post-trade**, including automation of hedge accounting documentation & swaps.

Kantox solutions enable **connectivity between multiple client systems (e.g.: ERP, TMS)** to seamlessly capture and manage risk.

POTENTIAL BENEFITS

Increase the effectiveness of your hedging program(s) and reduce risk and costs by systematically deploying the optimal hedging programme.

Increase efficiencies by automating the end-to-end FX workflow, save time and allow the treasury team to focus on more value-added tasks.

Improve governance and control by using Kantox as a centralised tool for real-time risk monitoring and reporting.

£1.2 M ✓
Projected reduction in P&L impact of unwinds

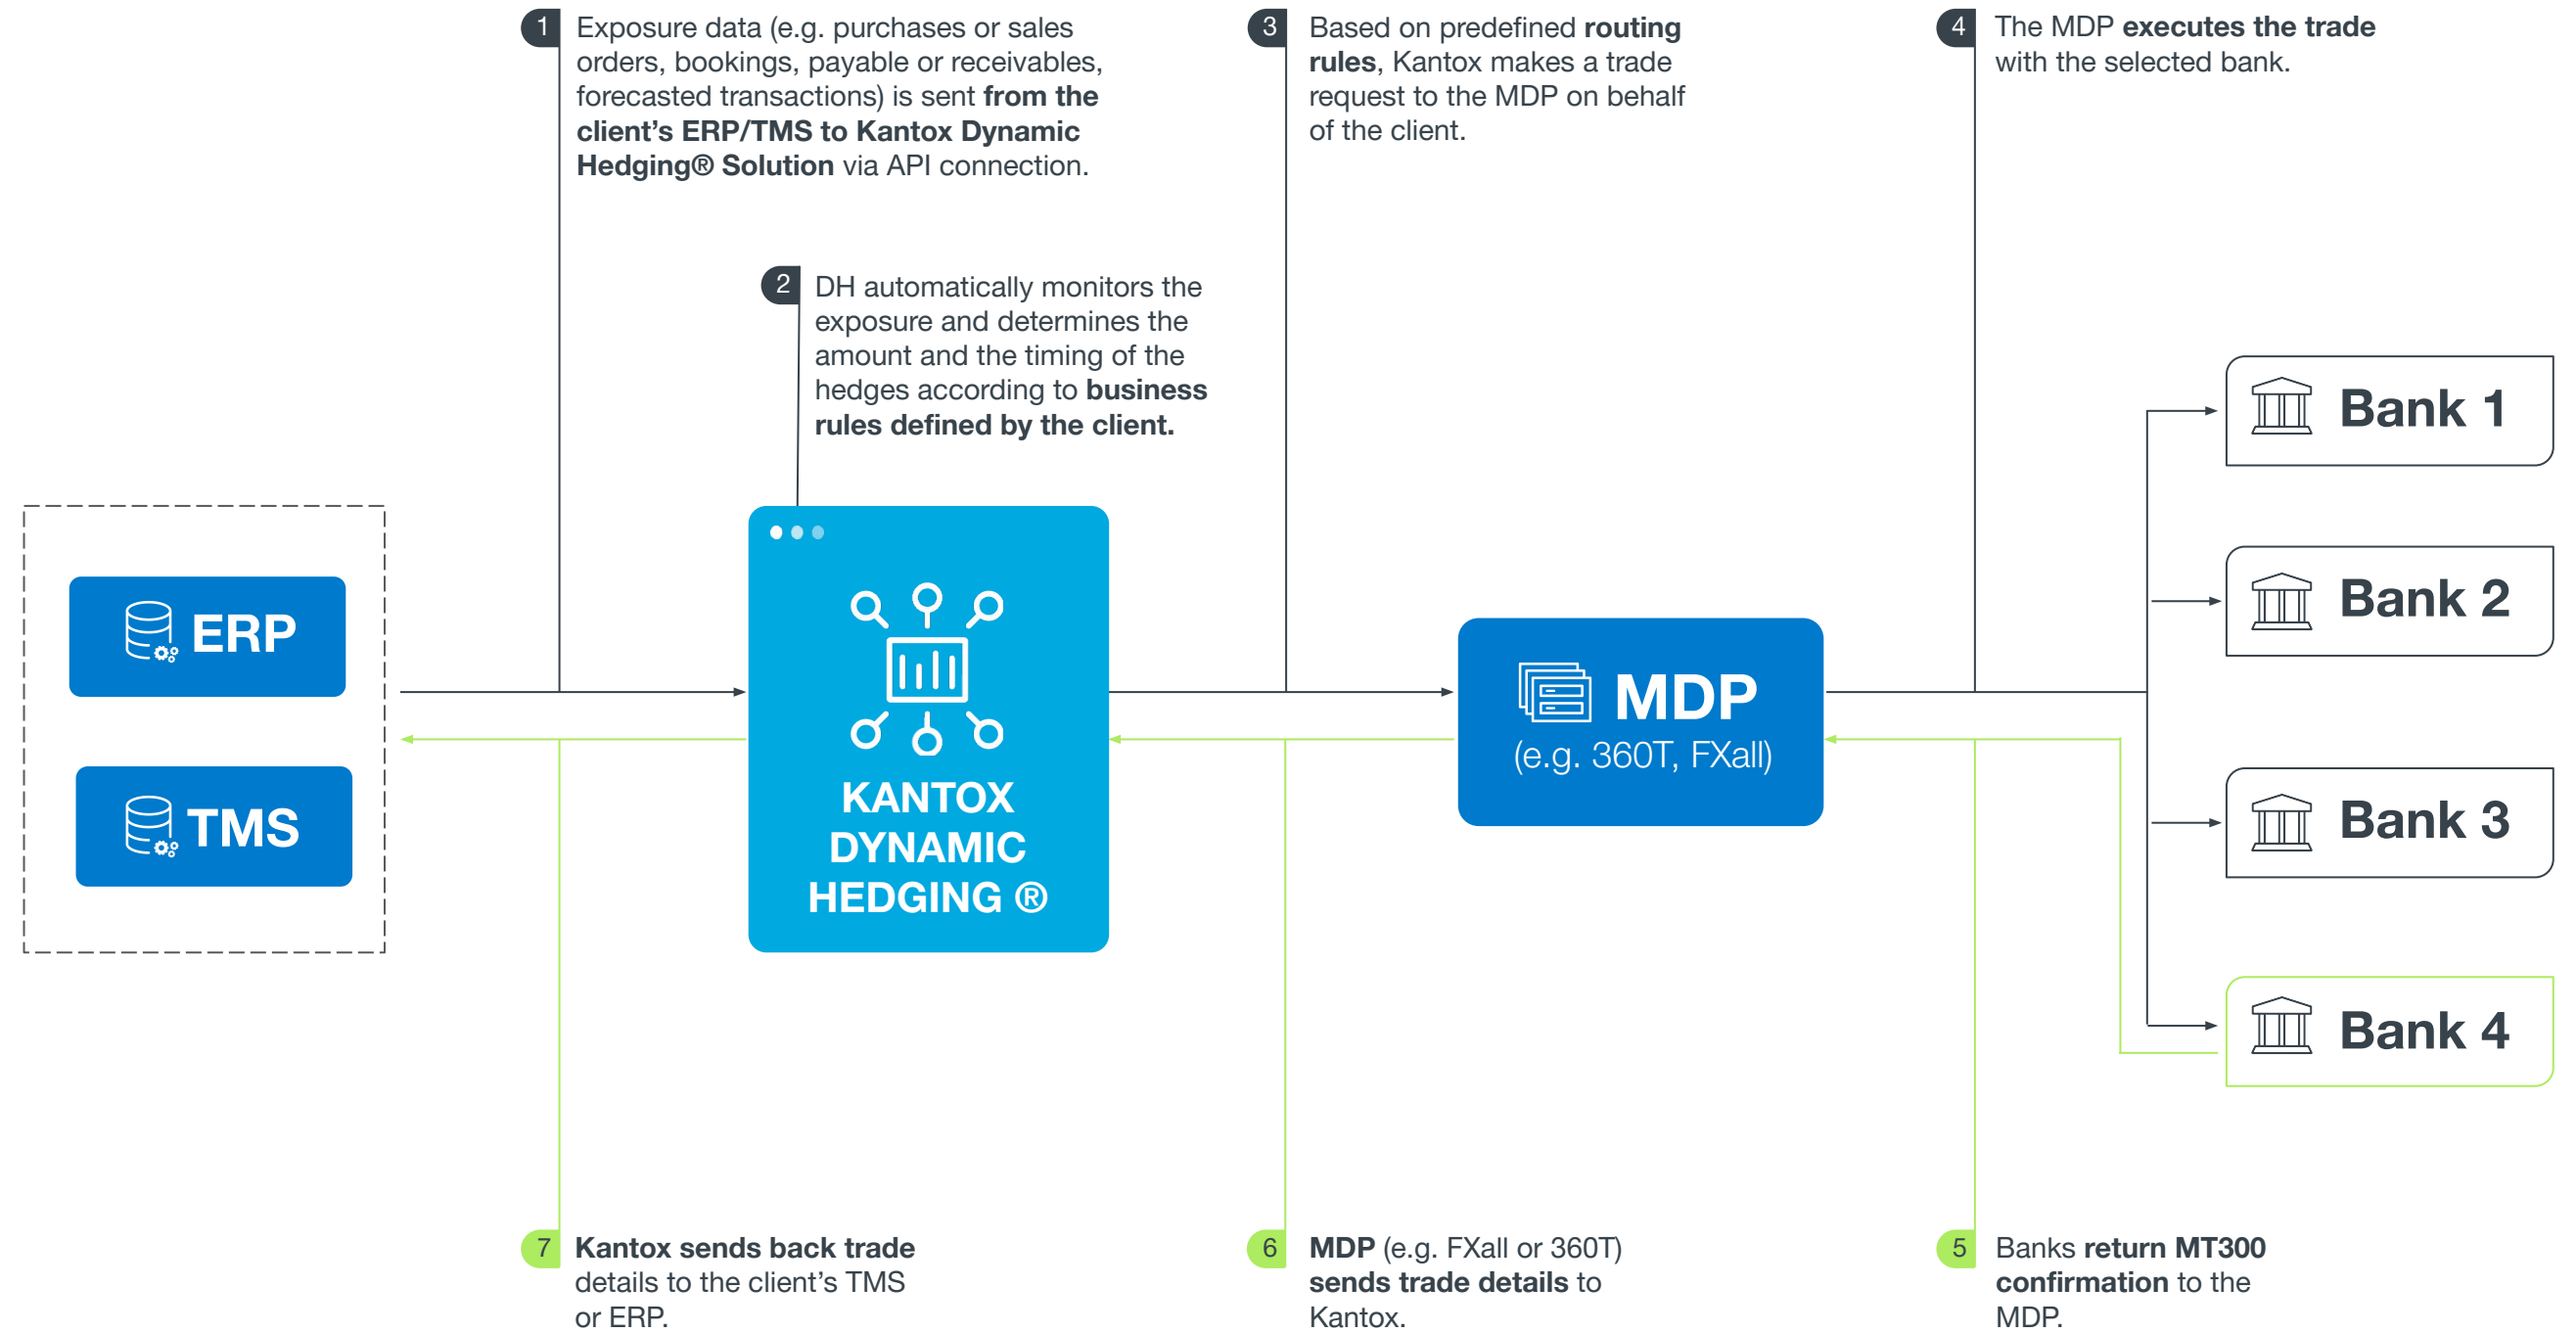

£2.7 M ✓
Projected improvement on annual average hedged rate

45% ✓
Time saved for treasury staff executing manual policy

“It is crucial for the corporate treasury to further automate processes in order to enhance internal controls, mitigate risks, fight against the growing risk of fraud and simplify processes.”

François Masquelier
Honorary Chairman of EACT
(European Association of Corporate Treasurers)
