

A Reliable Path Forward for EvoCharge Customers

EVOCHARGE[®]

powerflex

Earlier this week, EvoCharge announced the shutdown of its EV charging business. For commercial customers, this creates uncertainty about the future of your charging network, your drivers, and your operations.

PowerFlex is ready to step in today. With over 40,000 chargers under management and over a decade of industry leadership, we deliver the stability, reliability, and scale you need to keep your EV infrastructure online.

Why PowerFlex

Scale You Can Trust

PowerFlex manages one of the largest EV charging networks in the United States, with proven expertise across fleets, workplaces, campuses, and multi-family housing.

Proven Reliability

We deliver industry-leading reliability with 98%+ network uptime across thousands of managed stations, keeping your chargers are always up and running.

Seamless Transitions

Our open-standards platform makes it simple to migrate from EvoCharge. We integrate with existing hardware, scale alongside your growing EV needs, and ensure no disruption for your drivers.

What This Means for EvoCharge Customers

- Keep your chargers online with zero downtime
- Access the most trusted EV charging management platform in the market
- Future-proof your charging operations with EDF-backed expertise and innovation

Take the Next Step

Don't let EvoCharge's exit disrupt your operations. PowerFlex can help you transition now—quickly, seamlessly, and with the confidence that your EV infrastructure is in expert hands.
