GIOPATO & COOMBES

Inspired by the natural world and its organic forms, Scarabei collection comes to life from a concept of natural propagation, where repetition meets freedom, diversity merges with uniqueness, giving shape to luminous bodies that expand into space like living elements.

Each piece is one-of-a-kind, reflecting an unrepeatable process. Molten aluminum flows into earth molds, carrying human touch and natural essence. The ancient aluminum sand casting technique preserves intricate details while maintaining a raw, authentic texture. Each creation is a unique piece, the result of a process that combines craftsmanship, design, and experimentation.

The luminous domes house LED sources, diffusing a soft light that intertwines with the material. Pulegoso glass amplifies this interaction, creating a play of reflections and shadows in constant motion. Pulegoso glass creates a play of reflections and shadows in constant motion and amplifies the interaction between metal finishes and design.

Like a living organism that expands, replicating the concept of propagation in nature. Finishes shape the organic feel of a design: aluminum adds sleekness, bronze brings warmth and depth, blackened metal enhances contrast and texture while mineral white evokes purity and gives a brighter touch.
