6. Enter the namespace to customise your domain
7. Click **Finish** to complete the registration process.

The screenshot shows the CardByte 'Create Account' page. A progress bar at the top indicates four steps: 'Email Completed', 'Personal Info Completed', 'Company Info Completed', and 'Namespace In Progress'. The 'Namespace' step is the current one. Below the progress bar, the text 'Let's name your site' is followed by a subtext: 'Your site name is part of your CardByte URL. Most people use their team or company name.' A text input field contains 'microsoft' and a dropdown menu shows '.cardbyte.ai' with a green checkmark. Below the input field, a note says 'This site name is just a suggestion. Feel free to change to something your team will recognize'. At the bottom left is a 'BACK' button, and at the bottom right is a 'FINISH' button, which is highlighted by a large blue arrow pointing upwards.

8. A **pop-up window will appear**, informing you that a verification email has been sent to your registered email ID.

The screenshot shows the same CardByte 'Create Account' page, but with a modal pop-up window in the center. The pop-up is titled 'Please Verify Your Email' and contains the following text: 'You have successfully signed up!', 'We just sent an email to **chrisloyd1@microsoft.com**.', and 'Please click the link in the email to verify your account and login to the app.' At the bottom of the pop-up are two buttons: 'Resend Email' and 'Cancel'. In the bottom right corner of the background page, a green success message reads: 'Successfully signed up! Please verify your email.' with a close button (X).

9. Open your **registered email inbox**, find the verification email, and click **Verify Email**.

10. You're all set! Once your account is verified, you can start using CardByte
