

FIRST RESPONDER NEUROFIELD® PROGRAM

RESTORE. REGULATE. PERFORM.

NeuroField® neuro stimulation therapy uses gentle, non-invasive technology to improve brain regulation, emotional resilience, sleep, focus, and overall mental performance.

WHAT IS NEUROFIELD® NEURO STIMULATION THERAPY?

Neuro stimulation therapy uses a gentle, low-level stimulation on the scalp with specialized electrodes to bring oxygen and blood to specific areas of the brain to facilitate healing. As the stimulation therapy generates more efficient neural connections, our clients are noticing a dramatic difference in how they feel after just a few sessions.

MANY CLIENTS REPORT IMPROVEMENTS IN:

- ✓ Better sleep
- ✓ Improved concentration
- ✓ Reduced anxiety
- ✓ Better decision making
- ✓ Decrease in depression
- ✓ Emotional regulation
- ✓ Less brain fog
- ✓ Improved cognitive performance
- ✓ Fewer racing thoughts
- ✓ Reduction in PTSD symptoms
