9.00 a.m. – 5.00 p.m.

Singapore College of Insurance (SCI)

This 3-day course provides a foundational understanding of reinsurance principles, life reinsurance, treaty accounts, and various reinsurance types. It covers the advantages, disadvantages, and applications of proportional and non-proportional treaties, including common treaty clauses.

Target Audience

- Staff in reinsurance companies who support the underwriting, technical accounting and claims functions in their organisations.
- Other non-operational support staff working in reinsurance companies.
- Support staff working in reinsurance broking firms.
- Staff in reinsurance departments of direct insurance companies who support the placement, technical accounting and claims functions.
- Staff of regulatory bodies who need to understand the principles and practical applications of reinsurance.
- New entrants to the insurance and reinsurance industry.

Key Learning Outcomes

By the end of the workshop, participants will be able to:

- The concept of risk, insurance and reinsurance, benefits and limitations of reinsurance and the fundamental legal principles of insurance/reinsurance.
- The reinsurance market.
- The forms of reinsurance.
- Sum insured allocation at risk inception and loss recovery allocation in the event of a claim.
- Advantages and disadvantages of facultative reinsurance as well as the process of arranging facultative reinsurance.
- The workings of the various types of proportional and non-proportional treaties and their differences.
- Reinsurance accounting.
- Contract wordings.
- Life reinsurance.
- Office practice and procedure in relation to reinsurance.
- The contract certainty principles and guidelines as outlined by the Monetary Authority of Singapore.
