

When a deal leaks, EchoMark tells you the source – before the SEC asks

An M&A leak can collapse a deal worth millions, cause reputational damage, and trigger a regulatory investigation. EchoMark turns your breach investigation from inconclusive weeks to certainty in minutes.

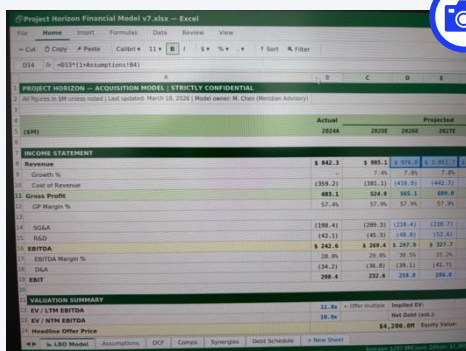

EchoMark embeds invisible, individualized watermarks into every deal document, earnings brief, and board communication so you can identify whose copy leaked and deliver court-admissible evidence to regulators.

LEAKED CONTENT

James,

Following our call this morning, I've updated the valuation bridge to reflect the revised EBITDA assumptions. A few critical points before the steering committee call at 2pm:

We are recommending a headline offer of **\$4.2B (11.8x LTM EBITDA)** — this reflects a 6% premium to our revised DCF midpoint and keeps us competitive against the other

Project Horizon — Acquisition Model (Strictly Confidential)

	Actual	2024A	2025E	2026E	2027E

LEAK IDENTIFICATION

Sample: Leaked PDF

Exact Match

john.smith@echomark.com
Based on Digital Stamp Detector, Invisible Watermark Detector

Digital Stamp Detector

Chance of error: 0%

Based on identification of the unguessable key embedded within the content of this marked copy.

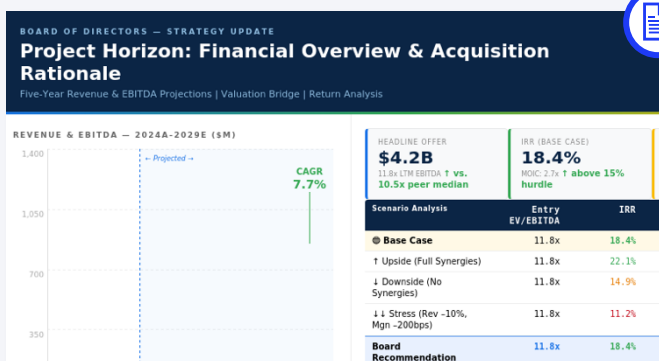

Result
john.smith@echomark.com

Invisible Watermark Detector

Chance of error: < 0.0001%

Based on the number of matching marks and the detector precision.

Result
john.smith@echomark.com

HOW IT WORKS

01

Watermark

EchoMark silently embeds invisible watermarks into every email, document, image, and screen

02

Leak occurs

A screenshot, photo, printout, or forwarded file appears outside your organization

03

Upload artifact

Submit the leaked artifact into EchoMark's investigation tool

04

Definitive answer

Identify whose copy was leaked, with a confidence score and chain of custody
