

When your product roadmap and trade secrets leak, identify the source

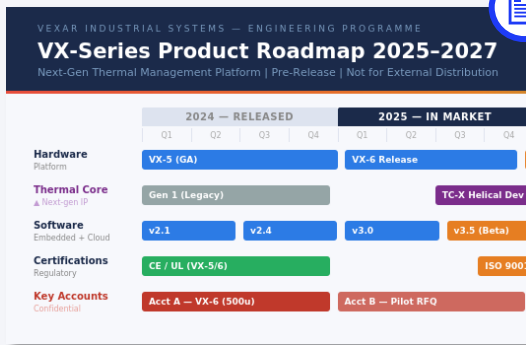

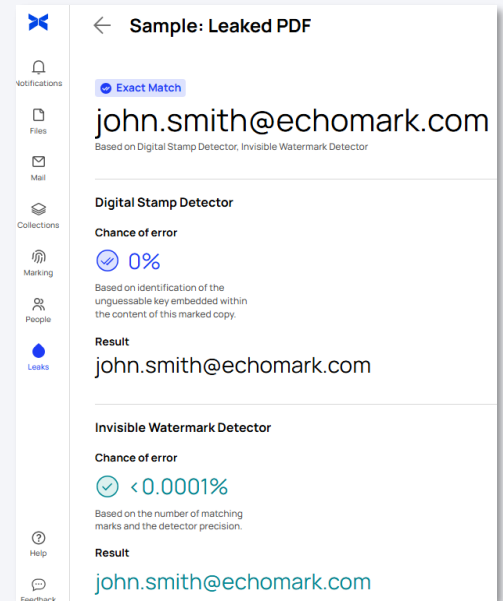

A leaked CAD file or product spec can hand a competitor years of R&D in an afternoon. EchoMark turns your leak investigation from weeks of inconclusive investigation to definitive answers in minutes, with forensic evidence.

EchoMark embeds invisible, individualized watermarks into every design document, supplier comm, and technical spec – so when your IP surfaces at a trade show or rival launch, you know whose copy was leaked.

LEAKED CONTENT

LEAK IDENTIFICATION

HOW IT WORKS

01

Watermark

EchoMark silently embeds invisible watermarks into every email, document, image, and screen

02

Leak occurs

A screenshot, photo, printout, or forwarded file appears outside your organization

03

Upload artifact

Submit the leaked artifact into EchoMark's investigation tool

04

Definitive answer

Identify whose copy was leaked, with a confidence score and chain of custody
