

Libra Europe partnered with VLT Logistics to assess operations across Transport, Warehouse, Finance, and VMU. Through a two-week diagnostic, the team identified opportunities to reduce manual effort, improve visibility, and establish a clear management cadence (MCRS) creating the structure and tools needed for consistent decision-making, operational control and creating a platform for growth

**2,300 NVA  
Hours Identified**

**MCRS  
Design**

**Operational  
Roadmap**

By streamlining duplicated admin tasks and digitising manual processes across departments.

Daily, weekly, and monthly meetings established with clear RACI, agendas, and reporting to drive consistency.

detailing phased implementation of governance, KPIs, and system improvements

## The Challenge

### The problem the client presented:

VLT Logistics wanted to bring greater structure to daily operations. Manual, paper-based workflows and inconsistent communication were creating inefficiencies and limiting visibility.

### What we looked at:

The absence of a unified management rhythm (MCRS) meant teams were operating reactively without a shared cadence or accountability.

Manual and duplicated admin processes were consuming time, limiting visibility, and masking true performance.

## Our Solution

**Developed a full MCRS:** Designed daily huddles, weekly reviews, and monthly strategy sessions with defined participants, agendas, and outputs.

**Clarified governance and accountability:** Created a clear organisational structure, RACI, and operating principles.

**Defined measurable KPIs:** Twelve key indicators established to monitor leading and lagging performance.

**Identified efficiency opportunities:** £25k of potential savings and 2,300 hours of time release through process simplification and digital optimisation.

**“**Libra were easy to work with and delivered exactly what they said they would, clear structure, better visibility, and a plan we can actually use **”**

**Andrew Land – MD &  
Owner**
