Electricity Supply Booking Form

ROYAL CORNWALL SHOW 2027

PLEASE INDICATE ON PLAN POSITIONS FOR ADDITIONAL POINTS IF REQ.
Supply will be installed at rear of stand unless otherwise stated.

REAR OF STAND

FRONT OF STAND

SOUTH WEST ELECTRICS LTD - CONDITIONS OF SUPPLY OF ELECTRICAL ENERGY AND FITTINGS ON HIRE

Supply 230 volts Single Phase, 415 volts Three Phase 50hz AC current. The charges detailed overleaf include for the supply 'on hire' and installation from the electricity power supply, a proportion of the necessary mains cable, together with all the necessary circuit wiring and fittings and for the taking down and removing at the close of the Show.

The electricity supply will be terminated at the nearest point on the stand to the distribution pillar unless shown different on the plan above.

All exhibitors will be held responsible for any equipment which is damaged or missing at the end of the Show.

Applications for supply must be received by us not later than the date on the bottom of the application form, after which date no guarantee will be given that the work will be carried out, but if it is carried out the cost will be as the price plus the surcharge as stated at the bottom of the application form.

We reserve the right to refuse to connect to the supply any faulty equipment. Any work carried out to bring it to the relevant standard will be charged at a time and material basis.

The following are not permitted: the use of generators OR sharing of supplies.

Supply of electricity to the showground is the responsibility of the Royal Cornwall Agricultural Association. Should such supply to the showground become unavailable for whatever reason, South West Electrics Ltd shall not be held responsible for loss of earnings or otherwise.

Supply of electricity should normally be available to most stands by 7.00pm on the day prior to the Show commencing until the official closure of the Show. However, should this not be possible for whatever reason South West Electrics Ltd shall not be held responsible for loss of earnings or otherwise. If you require supply at other times than this we will need to be notified with the application.

Cancellation refunds will only be given if notice of cancellation is received by South West Electrics Ltd prior to the deadline date stated on the order form.

The supply to each stand will be via individual circuit breakers of relevant size to that of supply booked. The result of overload will be loss of supply to your stand only and will require re-connection by Show Electrician. Please ensure you book an adequate supply. Any portable electrical appliance over 12 months old, intended for use at this event must display a valid PAT label or certificate; otherwise power will not be connected.

Connections between point of supply and mobile stands are the responsibility of the exhibitor.

We reserve the right to disconnect supplies for any essential maintenance without notice.

All work is carried out in accordance with South West Electrics Ltd terms and conditions which are available upon request
