About Tecumseh

A leading compressor manufacturer

Tecumseh Products is a global leader in the design and manufacturing of compressors for refrigeration and air conditioning systems. With a rich history and a focus on innovation, they provide a diverse range of compressors for residential, commercial, and industrial applications, serving customers worldwide.

The Challenge

Gaps in Logistics Operational Visibility

- » Tecumseh lacked real-time visibility into the location of their trucks, operating "blind" regarding their shipments' whereabouts.
- » Instances where drivers changed mid-trip went unnoticed by Tecumseh, creating gaps in shipment tracking data.
- » Frequent calls to drivers were necessary to obtain updates on shipment locations, consuming significant time and resources.
- » Customers lacked timely updates on their cargo's location, leading to frustration and uncertainty.

The Elyxr Solution

Achieving Logistics Efficiency Through Elyxr Control Tower

- ▶ The Elyxr app provides real-time tracking of truck locations, giving Tecumseh and their customers continuous visibility into shipment progress.
- ▶ Customers can easily view real-time shipment location updates directly within the Elyxr platform, enhancing transparency and improving customer satisfaction.
- ▶ Real-time tracking significantly reduces the need for constant calls to drivers for location updates, streamlining operations and freeing up valuable time.
- ▶ The Elyxr app allows for seamless driver changes within the system, ensuring continuous tracking even when drivers are switched mid-trip.
