

# Build a Culture of Clean Hands. Track It With Confidence.

A dedicated Hand Hygiene compliance module - giving your team the tools to audit, monitor, and improve hand hygiene practices across your entire Organization.

 Included with IPAC Management or as a standalone module

Hand hygiene is the **single most effective measure** to prevent the spread of infection in healthcare settings - yet compliance gaps remain one of the most common findings during inspections. Hand Hygiene Administrator makes it easy to close that gap.

Tracking hand hygiene compliance shouldn't mean clipboards, paper tally sheets, and hours of manual data entry. **Hand Hygiene Administrator** is a purpose-built mobile application that lets your team conduct audits on any device, view real-time compliance rates, and act on issues before they become inspection findings.

## HOW IT WORKS

**1**

### Set Up Audits

Tailored to your moments of care - supports WHO/CDC 5 moments or Canadian 4 moments standards.

**2**

### Collect Data

Auditors capture observations in real time on any device - at bedside, in hallways, anywhere care happens.

**3**

### Review Reports

Compliance rates, trends, and gaps surface automatically in dashboards - be inspection ready in seconds.

## KEY FEATURES

### Mobile-First Auditing

Complete audits from any device - no paper, no transcription. Observations are recorded and saved instantly, wherever care happens.

### Real-Time Dashboards

In-app dashboards help auditors and managers understand recent trends and potential compliance gaps at a glance.

### PPE Donning/Doffing Audits

Track PPE use compliance alongside hand hygiene - both captured within the same mobile application for a complete picture.

### Automated Email Summaries

Distribute compliance reports to unit managers on a recurring schedule. No manual effort required.

### Quality Thresholds & Benchmarks

Set compliance targets for your facility or organization and track performance against them over time.

### Connected to IPAC Management

Hand hygiene data lives alongside your infection surveillance data - giving you the full IPAC picture in one place.

### Any Care Setting

Acute Care, Long-Term Care, Assisted Living & more

### WHO/CDC & Canadian Standards

Supports 4 or 5 moments of hand hygiene

### Multi-Facility Ready

Flexible groups by region, state, or province

## WHY IT MATTERS

### Inspection Ready

Recognized by health authorities and inspectors across North America - proof of compliance in seconds.

### Team Accountability

Auditors can easily see real-time compliance. Putting emphasis on IPAC as a team approach.

### Fewer Infections

Better compliance directly reduces the risk of HAIs and cross-transmission events.

### Less Admin Work

Automated reports replace manual data entry saving hours every month.

### Real-Time Visibility

Managers and leaders can see compliance data as it's collected. No waiting for weekly reports.

### Flexible Deployment

Available as part of IPAC Management or as a standalone module.
