

Bandalong Litter Trap™

Proven Solution for Floating Litter Control in Rivers and Streams

The Bandalong Litter Trap™ passively captures floating litter and debris using only the natural current. With no nets or barriers to restrict wildlife, it operates 24/7/365 without causing flooding or disrupting recreation.

Specifications

- Sizes Available: Multiple models to accommodate a variety of waterway sizes.
- Construction: HDPE booms with powder-coated metal components for maximum durability.
- Warranty: 10-year limited warranty on HDPE booms.

Key Features

- Natural Current Capture: Passively collects debris 24/7/365.
- Wildlife-Safe Design: No nets or barriers, allowing free aquatic wildlife movement.
- Tidal Gate Technology: Patented gate prevents trash from escaping the trap.
- Flood-Safe Operation: Maintains water flow and prevents blockages.

Advantages

- Proven Performance: Over 195 installations worldwide — Made in the USA.
- Customizable Options: Walkways, work platforms, attachable filtering media, and sponsor signage available.
- Cleaning Options: Multiple litter removal methods to suit site needs.
