

StormX™ Netting Trash Trap

End-of-Pipe Solution for Capturing Floating and Non-Floating Debris

The StormX™ Netting Trash Trap is a high-performance device designed to capture non-floating debris at the end of pipes, headwalls, and other concrete structures. Available in customizable sizes, StormX™ prevents trash from entering waterways.

Specifications

- Custom Fit: Available for all standard and custom pipe sizes.
- Materials: Stainless steel with durable, UV-resistant netting.
- Models: Full Capture, Weir, and Half Pipe Weir — one-piece or two-piece designs for manual or mechanical cleanout.

Key Features

Continuous Operation: Captures debris 24/7/365.

Easy Installation: Installs with standard tools — no heavy equipment required.

Custom-Fabricated: Tailored to fit pipes, headwalls, and concrete structures.

Minimal Water Flow Disruption: Maintains water flow and prevents blockages.

Advantages

- Debris Control: Captures both floating and non-floating trash.
- Cleaning Options: Manual or mechanical cleanout available.
- Low Maintenance: Designed for long-term use with minimal upkeep.
- Customizable Solutions: Adaptable to site-specific needs and challenges
