# Harmonized Tariff Schedule Codes Classification

Accurately classify large product catalogs into the correct HTS Codes - USITC. Ensure compliance with trade regulations.

Chapter → Heading → Subheading → Tariff Code

## Accurate & Scalable
Trained ML models classify SKUs regardless of complexity, volume or nuances in the catalog

## Up-To-Date Tariff Codes*
Stay on top of changing tariff codes, as and when they are revised

*2025 HTS Code Revision 11

## Risk Management
Adherence to standards reduces risk from violations, ensuring no delays or fines

## Save Costs & Time
Avoid overpayment and underpayment of duties, leverage supply chain benefits

# Why choose us?

## Time and Resource Savings
Automating the Tariff Code Classification process reduces manual effort, and enables scale.

## Intelligent Automation
Our ML models are trained on product data and use contextual analysis for classification.

## Self-learning Model
The model constantly learns from human feedback and accuracy improves over time.
