## SJØBJØRN 38 FPC

The SJØBJØRN 38 FPC is a cutting-edge patrol boat developed in close collaboration with the Norwegian Defence Materiel Agency. Engineered for versatility and durability, it offers a robust platform tailored to meet the demands of modern maritime operations. Constructed from high-strength, marine-grade aluminum, the boat incorporates recycled materials to minimize environmental impact, and is designed for partial recyclability at the end of its service life.

Its design prioritizes operational flexibility, providing a stable and spacious working area while ensuring compatibility with existing naval infrastructure. With high-speed capabilities and excellent maneuverability, the SJØBJØRN 38 performs reliably in challenging sea conditions. Building on the legacy of the Sjøbjørn 23 and 25 models, it introduces enhanced capacity and performance in a larger format, making it an ideal choice for coastal patrol, search and rescue, boarding operations, and naval support.

The SJØBJØRN 38 FPC represents a significant advancement in Maritime Partner's portfolio of military vessels—combining proven design principles with forward-looking sustainability and mission-readiness.

### Technical data:

Overall length: 11,5 metres

Length hull: 10,5 metres

Breadth extreme: 3,5 metres

Breadth hull: 3,1 metres

Weight light ship: 7.250 kg

Speed: 42 knots

### Engine:

2xVolvo Penta D6 - 480 HP Diesel Inboard

### Propulsion:

Std: Hamilton HJX29

### Materials

Hull made of marine aluminium and divided into five separate watertight compartments. The fender system is made of special foam, and protected with tailor-made PVC cover.

Lifting arrangement is made of high quality steel, fitted with approved off-load release hook.
