Third Party Service Partners
Supporting Pear Deck Learning Offerings

(as of June 30, 2026)

Our Partners

We continuously strive to make our products the best they can possibly be, but we cannot build everything on our own. Like other education software companies, we rely on tools built by third party companies to deliver better solutions to our customers. These third party partners offer essential services and functions to our customers, and each company we work with operates under an agreement with Pear Deck Learning to protect information shared with them.

Below is a list of our trusted and essential third party partners that collect **Personal Student Information** (as defined in our Privacy Policy) that support Pear Deck Learning Offerings.

As our company and products continue to evolve and grow, we may need to update this list of third party service partners from time to time. Additionally, please feel free to contact us at privacy@peardeck.com if you have any questions.
