

Destination Manager

Branded Digital Parking Platform

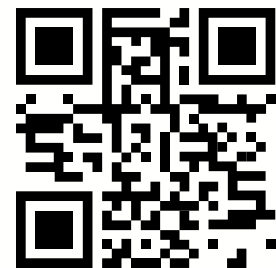

A convenient, white-labeled payment platform for on/off-street parking that supports Scan-to-Pay, Reservations, and Scan-In/Scan-Out processes.

Scan-to-pay for parking is a convenient, contactless payment solution that allows drivers to quickly pay for parking with their smartphone.

Customized workflows can be tailored to meet specific local requirements, with the user interface supporting validations, reservations, and start/stop processes.

Scan to Park

**PARKING
BASE**

Scan to Pay

Users scan the QR code, access a secure page to enter vehicle info, select parking duration, and pay via credit cards or mobile wallets.

Google & Apple

Destination Manager is integrated with

- Google Pay
- Apple Pay
- Google Maps

Reservations

Mobile web application integrates with the reservation platform so parkers can apply pre-bookings to transient payment processes.

Validation & Couponing

Easily process merchant validation or coupon codes and track consumption for future invoicing.
