PARKING BASE

Enforcement

Efficient & Fair Enforcement is Possible

No one likes getting or giving parking citations, which is why easy-to-manage parking enforcement is so important. When residents and visitors understand the rules, compliance improves, citations drop, and everyone wins.

The Parking Base system offers over 1,300 APIs (Application Programming Interface allow software applications to communicate with each other).

These APIs make integration with enforcement platforms, handheld devices, mobile enforcement vehicles, camera-based citation systems, and immobilization tools possible and seamless.

This flexibility enables property managers to customize enforcement programs and escalation processes to meet their location's specific needs.

Compliance

Citations

Let's you tailor your enforcement policies to match the offense.

Enforce issues such as:

>> **Safety issues**

>> **Expired permit or guest pass**

>> **Improper parking**

We maintain over 1,300 APIs to facilitate seamless integration with your existing equipment and processes.
