PARKING BASE

Access User Groups

One Permit. Multiple Locations. Less Hassle

Parking access just got smarter. With Access User Groups, managing multiple parking locations is now seamless, efficient, and hassle-free. Now a single permit grants access to multiple parking areas—eliminating the need for multiple credentials and simplifying the experience.

How It Works

Imagine a student-athlete who needs access to six different parking areas:

1 Permit

2 Student Athletic Garages

3 Student Dormitory Lots

1 Off-Campus Lot

Instead of juggling multiple permits, Access User Groups allows all these locations to be covered by a single permit. The result? Less confusion, fewer administrative hassles, a seamless parking experience, and a reduction in paper and plastic waste.

Perfect for Any Multi-Location Campus

While ideal for universities, Access User Groups is also a game-changer for hospitals, corporate campuses, and other organizations that need flexible, streamlined parking access.

Why It Matters

- Simplified Parking Management – One permit instead of many.
- Better User Experience – More convenience for students, employees, and visitors.
- Increased Efficiency – Easier management for parking administrators and enforcement teams.

With Access User Groups, parking is smarter, simpler, and more sustainable.
