Enterprise Manager

Manage revenue flow through GL mapping, reconciliation and third party ERP Integrations.

PARKING BASE

Built for how parking finance actually works. Enterprise Manager delivers an accounting-first approach with clean, general-ledger-ready data.

Unify Your Parking Data Without Compromise
- Integrates Parking Base and third-party data through 1,300+ APIs into a single data model
- Normalizes transactions at the source using ETL processes
- Supports transaction-level reporting across PARCs, aggregators, and third-party payments
- Maps attributes directly to predefined general ledger accounts

Accelerate the Close Without Rework
- Speeds month-end close through direct general ledger integration
- Produces accounting-ready reports and journal entries for your ERP system
- Eliminates manual entry of third-party and aggregator revenue
- Delivers portfolio-wide financial visibility across systems and locations
- Simplifies revenue and payment reconciliation using Parking Base's transactional and integrated payments data

Gain Business Intelligence Through Built-In Dashboards
- Provides dashboards built on Parking Base and third-party transactional data
- Visualizes performance by region and facility
- Converts natural-language prompts into instant analytics
- Gives key stakeholders access to real-time KPI dashboards
