

A Step-by-Step Storm Preparation Checklist

1. Before storm season

- Clean gutters and downpipes
- Inspect external pipe fittings
- Check drainage around property
- Clear drains and grates
- Test sump pumps
- Seal door and window gaps
- Trim overhanging branches
- Check basement waterproofing

2. When heavy rain is forecast

- Secure outdoor furniture
- Move valuables off floors
- Check retaining wall drainage
- Prepare an Emergency Kit

If you do get flooded - JAE are here when you need us

Acting fast is key to minimising water damage, so we recommend contacting your insurance provider as soon as possible. If you're unable to reach them quickly, JAE's qualified team can step in to help right away.

As an insurance-approved supplier, we work with all major insurance companies, just have your insurer and policy number ready and can begin the drying process while your claim is underway. We're here to take the stress out of the situation and get your home dry and safe again.
