

USE CASE

Team-Based Workflow

Use Case

Customer has multiple teams which need to have a separate workflow inside of IriusRisk for progressing through threat models.

Requirements

Team A needs to have Workflow steps 1 - 9 when they access the threat model inside of IriusRisk. Team B needs to have workflow steps 10 - 12 when they access threat models inside of IriusRisk.

Solution

Build a linear workflow that appears multi tenancy by using the rules engine to limit visibility into workflow processes and automatically starts users in the right workflow states.
