USE CASE
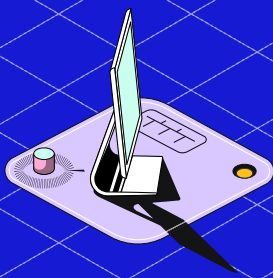

Program Design & Rollout

Use Case

Customer is wanting to build and scale a threat modeling program. They have a well designed process but it is centralized to a single team.

Requirements

Three additional teams are identified as expansion points for threat modeling. Those teams need product and content training.

Solution

Work with customer POC to develop and execute rollout plan. This includes - program evaluation, future state targeting, gap analysis, training, stakeholder review, training, product configuration assistance.
