

COIL+™ GO FURTHER.

Defying Friction, Redefining Depth

STEP's Coil+ redefines traditional coiled tubing by enabling unprecedented reach in deep, long-lateral wells, helping operators achieve total depth (TD). Coil+ extends string length beyond conventional limits and supports a wide range of applications.

This innovation not only pushes industry boundaries but also delivers improved efficiency. With streamlined processes and advanced equipment configurations, STEP continues to set new benchmarks in coiled tubing intervention, ensuring clients benefit from enhanced performance and optimized operations.

Coil+ Unmatched Performance - Faster than Conventional

STEP's Coil+ technology exceeds conventional coiled tubing reach, delivering unmatched performance in long-lateral wells..

Applications

- Plug mill-outs
- Acid stimulation
- Wellbore cleanout
- Confirmation runs

Key Benefits

- Reach new depths and enhance wellbore access
- Achieve faster running-in-hole speeds and reduced completion time than conventional coiled tubing
- Improved wellbore cleaning
- Deferring production cleanouts
- Optimize operations

Features

- Up to 2-5/8" inch OD coiled tubing
- Up to 36,000 ft depth capability
