

CHIEF EXECUTIVE OFFICER'S REPORT

JUNE 2019

Health Colorado – Cathy has been informed that the state gave their blessings for her to be hired as the new CEO of Health Colorado. Her last date with us will be July 8, 2019. We have already posted the position and will be actively recruiting for her replacement. In the meantime, Cindy Lopez will be acting as interim CFO under the supervision of the COO, Victoria Romero.

We are sad to see her move on, but we are equally excited for her to have this opportunity to help manage the contract. She will be hiring three additional positions and will be able to concentrate on the high priority issues that are in play.

Mobile MAT – We have been awarded the mobile MAT (Medicated Assisted Treatment) vehicle to travel many locations in the valley that need services. This vehicle is a RV that has been retrofitted for this type of service. The program is a pilot effort to reach out to remote areas of Colorado and make services available to populations that do not have the means to travel great distances for services. The vehicle is due to arrive the middle of September 2019. This pilot will help demonstrate our effort to expand SUD (Substance Use Disorder) in the outlying areas of the valley. It will compliment all of our satellite offices and any other locations we need to expand into.

Staff Recruitment – Victoria has been successful in filling the position she vacated. She will hire Leova from Valley Wide.

Billboards advertisement for our services – We are in the process of stepping up our campaign to notify the public of the services we provide. We will be contracting for 8 billboards to bring our brand to the public. These costs are eligible to be factored into the RVU calculation.

Highway Clean Up – We adopted a section of Highway 285 and completed our first cleanup operation this past Friday. The crew worked hard and gathered so much trash that they had to go for more trash bags. They were gifted with a barbeque lunch.

CBHC – Doyle Forrestal, CEO had been selected to serve as a board member to the National Council. This is a very important position to hold given that many policy decisions on the national level come through this entity for review and comment. We have had several members hold this seat and are very familiar with the policy issue at this level. She will do a fantastic job.

Beacon sold to Anthem – The 4 mental health centers have agreed to hire an attorney to review what our options are as it relates to our partnership agreement. We will have to determine if the contract has been compromised. More to come.
