

Medical Device Product Security Intelligence

Smarter Investments. Measurable ROI.

The Challenge

Without a thorough cybersecurity strategy, your product won't reach the market. You're likely facing:

- **Tight timelines:** Product cybersecurity can't be the bottleneck.
- **Limited budget:** Where will security investments deliver the highest ROI?
- **Fragmented implementation:** Each team does it their way, making it harder to scale, govern or plan.

The Solution

Medcrypt's Cybersecurity Product Security Intelligence enables you to:

- **Accelerate** time to market by identifying and addressing security gaps early.
- **Invest** resources where they deliver measurable value.
- **Track** your security maturity over time post-approval and prepare for future improvement.

With Medcrypt you will:

Establish your cybersecurity baseline in minutes:

Quickly assess your current cybersecurity posture across products, infrastructure and teams.

Benchmark across your organization and industry:

Know where you lead and where to improve.

Quantify dollar risk of cybersecurity debt:

Translate gaps into real dollar exposure to drive prioritization and secure buy-in.

Explore mitigation options with cost and impact insights:

Identify what to fix & evaluate mitigation strategies with cost-benefit analysis to make data-driven decisions.

Align the business:

Drive strategic security investments using data-driven roadmaps.

Built for lifecycle impact:

- Aligns with premarket and postmark regulatory approval benchmarks
- Tracks your improvement progress over time
- Supports roadmap planning and long term budgeting

Before the Cybersecurity Maturity Platform, Medcrypt helped us create adaptable baseline security requirements that met global customer and regulatory expectations, expediting both device approvals and measures to address security debt.”
