Learn more about the Customer Advisory Board

This year we hosted our **first annual Customer Advisory Board meeting** in San Diego. Our CAB represents some of the most influential voices in IP who have helped shape our mission to build the go-to AI platform for patent professionals. At the Annual Meeting, we reflected on our journey since founding in June 2023 to now partnering, and discussed the future of AI in the patent industry.

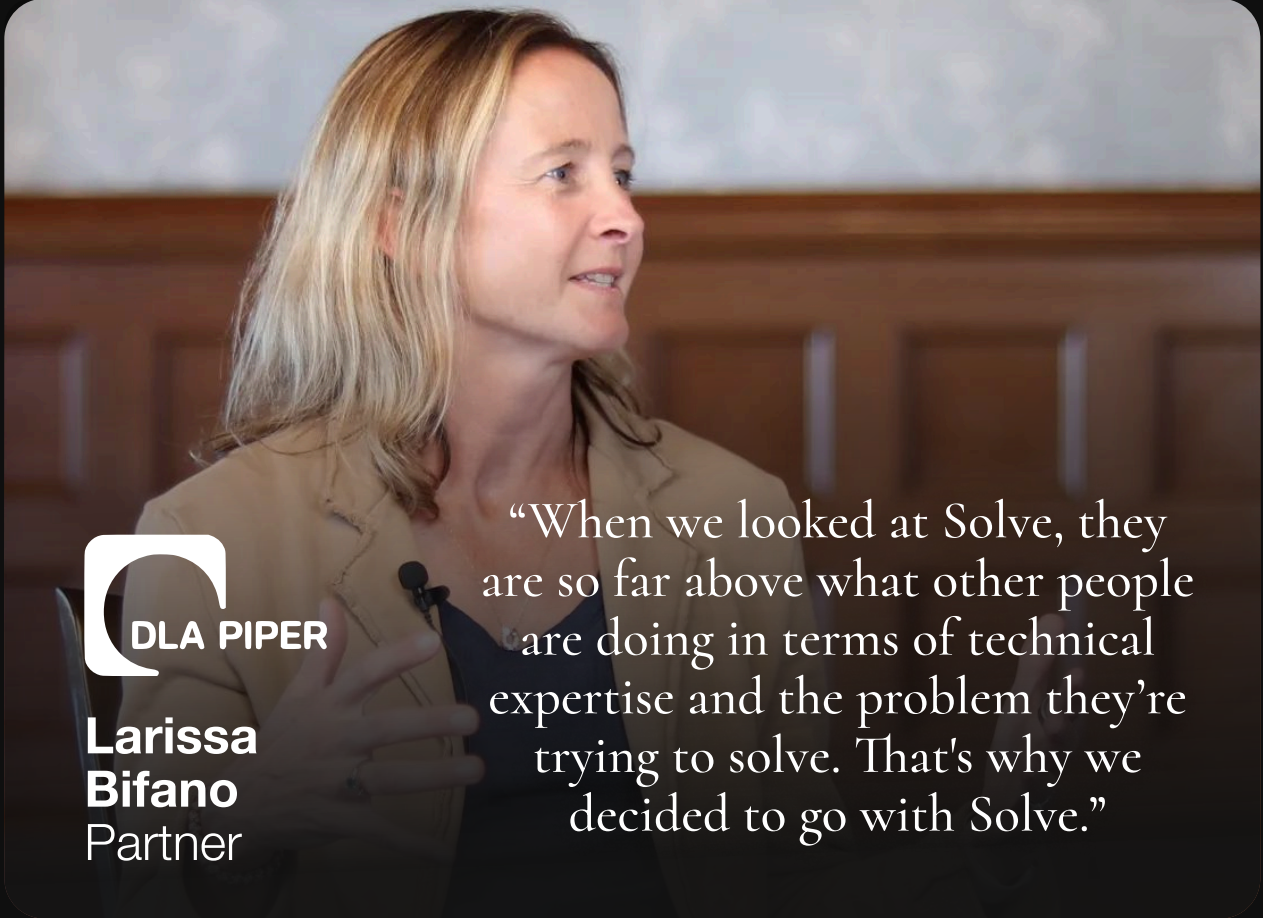

“Solve Intelligence stands out for their genuine customer obsession, particularly in how they partner with users to co-create tailored templates. Their hands-on engagement ensures that the platform isn't just a tool, but a well-calibrated solution for different client or technology specific patent applications.”

Global Team Growth & Office Expansion

With our team expanding across U.S. and Europe, Solve is growing to better support our customers across the world.

A New Home in London

Our new London office enables us to significantly expand our engineering, legal and product, and sales teams, bringing top-tier talent together in one of the world’s leading innovation hubs. By growing these teams locally, we are accelerating product development, deepening legal and technical expertise, and strengthening customer engagement across regions. This expansion allows us to build and support solutions more effectively while scaling alongside our customers’ needs.

“Coming from an IP-focused law firm, I recognized immediately that Solve Intelligence was building something transformative: not just a product, but AI-powered tools that fundamentally change how patent experts protect innovation. Watching our technology and team evolve this year has only deepened that conviction. Reflecting on what we’ve accomplished in such a short time, I’m energized by what’s ahead and inspired by the people driving the future of AI-powered patent law.”

Christian Berrios, PhD
Legal & Product Engineer
Past: Sterne, Kessler, Goldstein, & Fox

New Offices in New York and Munich

We are expanding our global presence to better support our customers and meet them where they are around the globe, including new offices in New York and Munich.
