ROBLING MEDICAL
Built On Connection

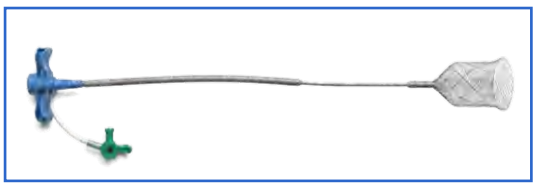

CARDIOVASCULAR DEVICES

Development • Manufacturing • Commercialization

Seamless connections from concept to scalable manufacturing for minimally invasive cardiovascular devices.

Robling Medical partners with cardiovascular innovators to develop, manufacture, and commercialize complex Class II–III electromechanical systems, single-use interventional, and implantable medical devices. From early engineering support through validated, scalable production, our cross-functional teams help reduce risk while accelerating time to market.

DEVICE EXPERIENCE:

- Balloon Catheters
- Cryotherapy Systems
- Diagnostic Catheters
- Guide Catheters
- Delivery Systems
- Electrophysiology Devices
- Introducer Systems
- Access Kits
- Hemostasis Accessories
- Vascular Retrieval Devices

Connecting Development to Commercial Production

Proof of Concept

KEY CAPABILITIES

- ISO 13485 manufacturing of both complex electromechanical systems, interventional devices, procedure kits, and consumable accessories.
- Catheter manufacturing processes including cutting, tipping, reflowing, bonding, punching, and forming
- Precision assembly of minimally invasive therapies and single-use visualization systems
- Solvent, UV, and epoxy bonding of fluid path components
- Ultrasonic welding, RF welding, heat staking, and laminating
- Kitting, sterile barrier packaging, and sterilization management
- Electromechanical assembly and testing
- Supply chain management including procurement and vendor qualification
- Final processing including packaging, sterilization coordination, warehousing, and distribution

The Robling Difference

Deep experience with single-use devices and electromechanical systems

Cross-functional teams that bring design, quality, and production together

U.S.-based operations for enhanced communication, speed, and regulatory alignment

Proven results supporting clinical builds and commercial scale-up

ISO 13485 CERTIFIED | FDA REGISTERED | U.S.-BASED MANUFACTURING
