- » Adobe XD
- » Figma
- » MS Word
- » MS PowerPoint
- » Miro

Development

- » HTML
- » CSS
- » JavaScript
- » React.JS
- » Node.JS
- » MySQL
- » NoSQL
- » Visual Studio Code
- » MongoDB
- » Postman
- » MS Excel

Career Objective

As a highly motivated and execution-driven web developer with experience building full-stack applications using React, Node.js, and both MySQL and NoSQL databases, my goal is to work in a collaborative environment where I can continue to grow my skills. Seeking a company where I can contribute to meaningful web solutions and make a significant impact.

Experience

Junior Web Developer 2025 \\ 2026 Staxx Digital

Collaborated with the team to build and maintain responsive web applications. Responsibilities during the website building process included:

- » Designed pages and mockups in Figma for client
- » Worked with the team to get design approved
- » Developed the pages using HTML, CSS, and JavaScript
- » Collaborated with client to receive feedback and then made updates after assessing feedback
- » Participated in debugging, testing, and troubleshooting

Starbucks 2019 \\ 2026 Barista

Self-sufficient and able to work in a fast-paced, high-pressure environment. Efficiently able to handle multiple tasks in a timely manner. Responsibilities included:

- » Engaged with customers, prepared drinks, and managed transactions independently
- » Demonstrated a strong work ethic and trained numerous coworkers

Projects

Food Order App 2025 \\ 2026

Developed a full-stack Food Order application using React, Redux, and React Router for the user-facing front end, and Node.js for the backend API layer. Styled all 11 admin-side pages with CSS. Designed and managed databases in both MySQL and MongoDB, handling schema design, data insertion, and retrieval using joins, aggregate functions, and document queries. Implemented user registration, sign-in, and session management using JavaScript and Fetch API.

Football Database App 2025 \\ 2026

Developed a web-based application that allows users to browse and search for information about a collection of football clubs. The application displays details about each club, including its name, logo image, city, and players. Built using JavaScript ES6 concepts including map, filter, find, includes, join, and template strings.
