

Sustainability Achievements 2025 Acquarius

Technology & Equipment Reuse

At Acquarius, sustainability guides our actions. We've repurposed tech and office supplies—donating PCs, monitors, and laptops to local charities and schools. By equipping staff with a single hybrid-use laptop, we reduced energy use and hardware waste. Even surplus stationery and old stamps were reused or donated, ensuring nothing went to waste.

Energy Efficiency

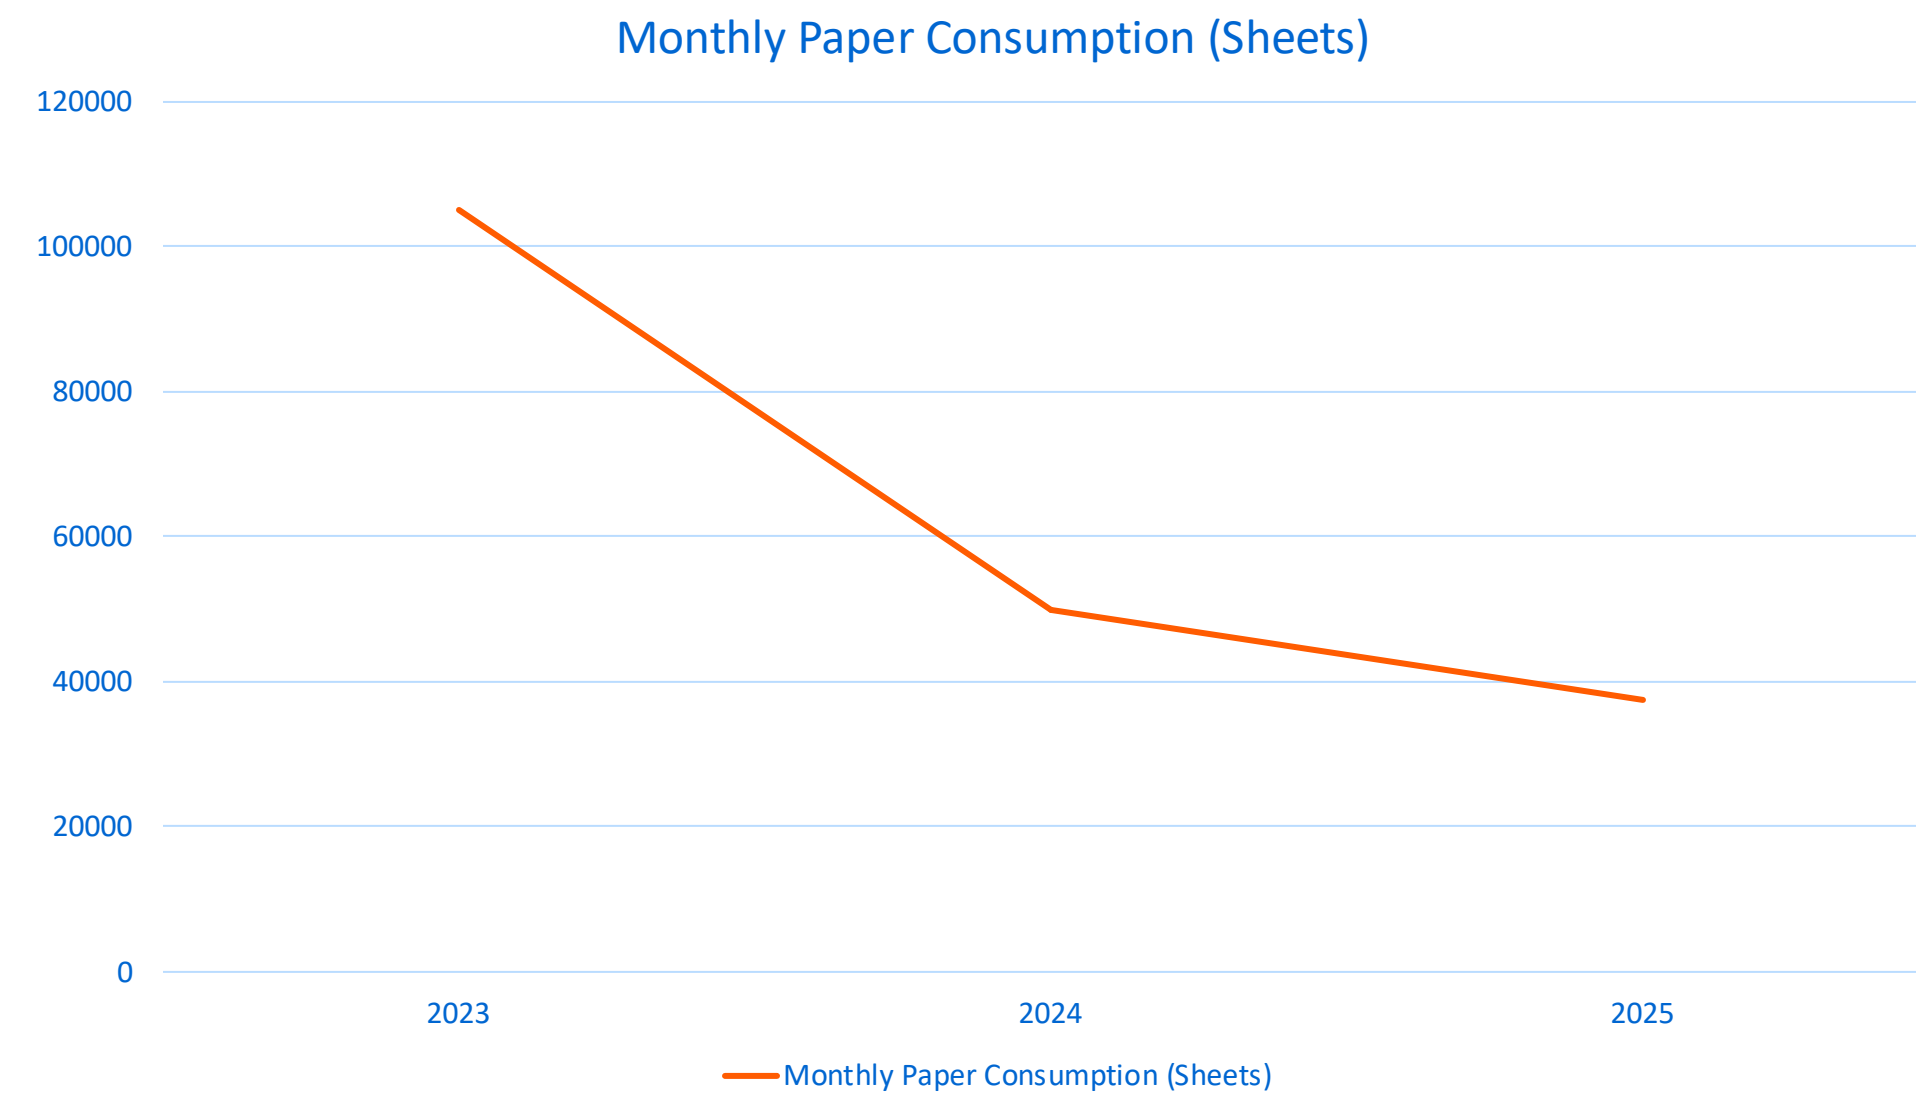

We've moved to cloud-based systems, cutting down on physical infrastructure and boosting energy efficiency. This digital shift supports our sustainability goals by reducing emissions. We also fine-tuned office cooling settings—small changes that make a meaningful environmental impact.

Waste Reduction & Everyday Choices for a Sustainable Workplace

We've embraced paperless filings, reduced single-use plastics, and switched to reusable glass bottles and mains-connected water. A non-capsule coffee machine cuts packaging waste, and we've introduced sustainable sanitary products—embedding eco-conscious choices into daily office life.

Sustainable Practices, Partnerships & Measurable Impact

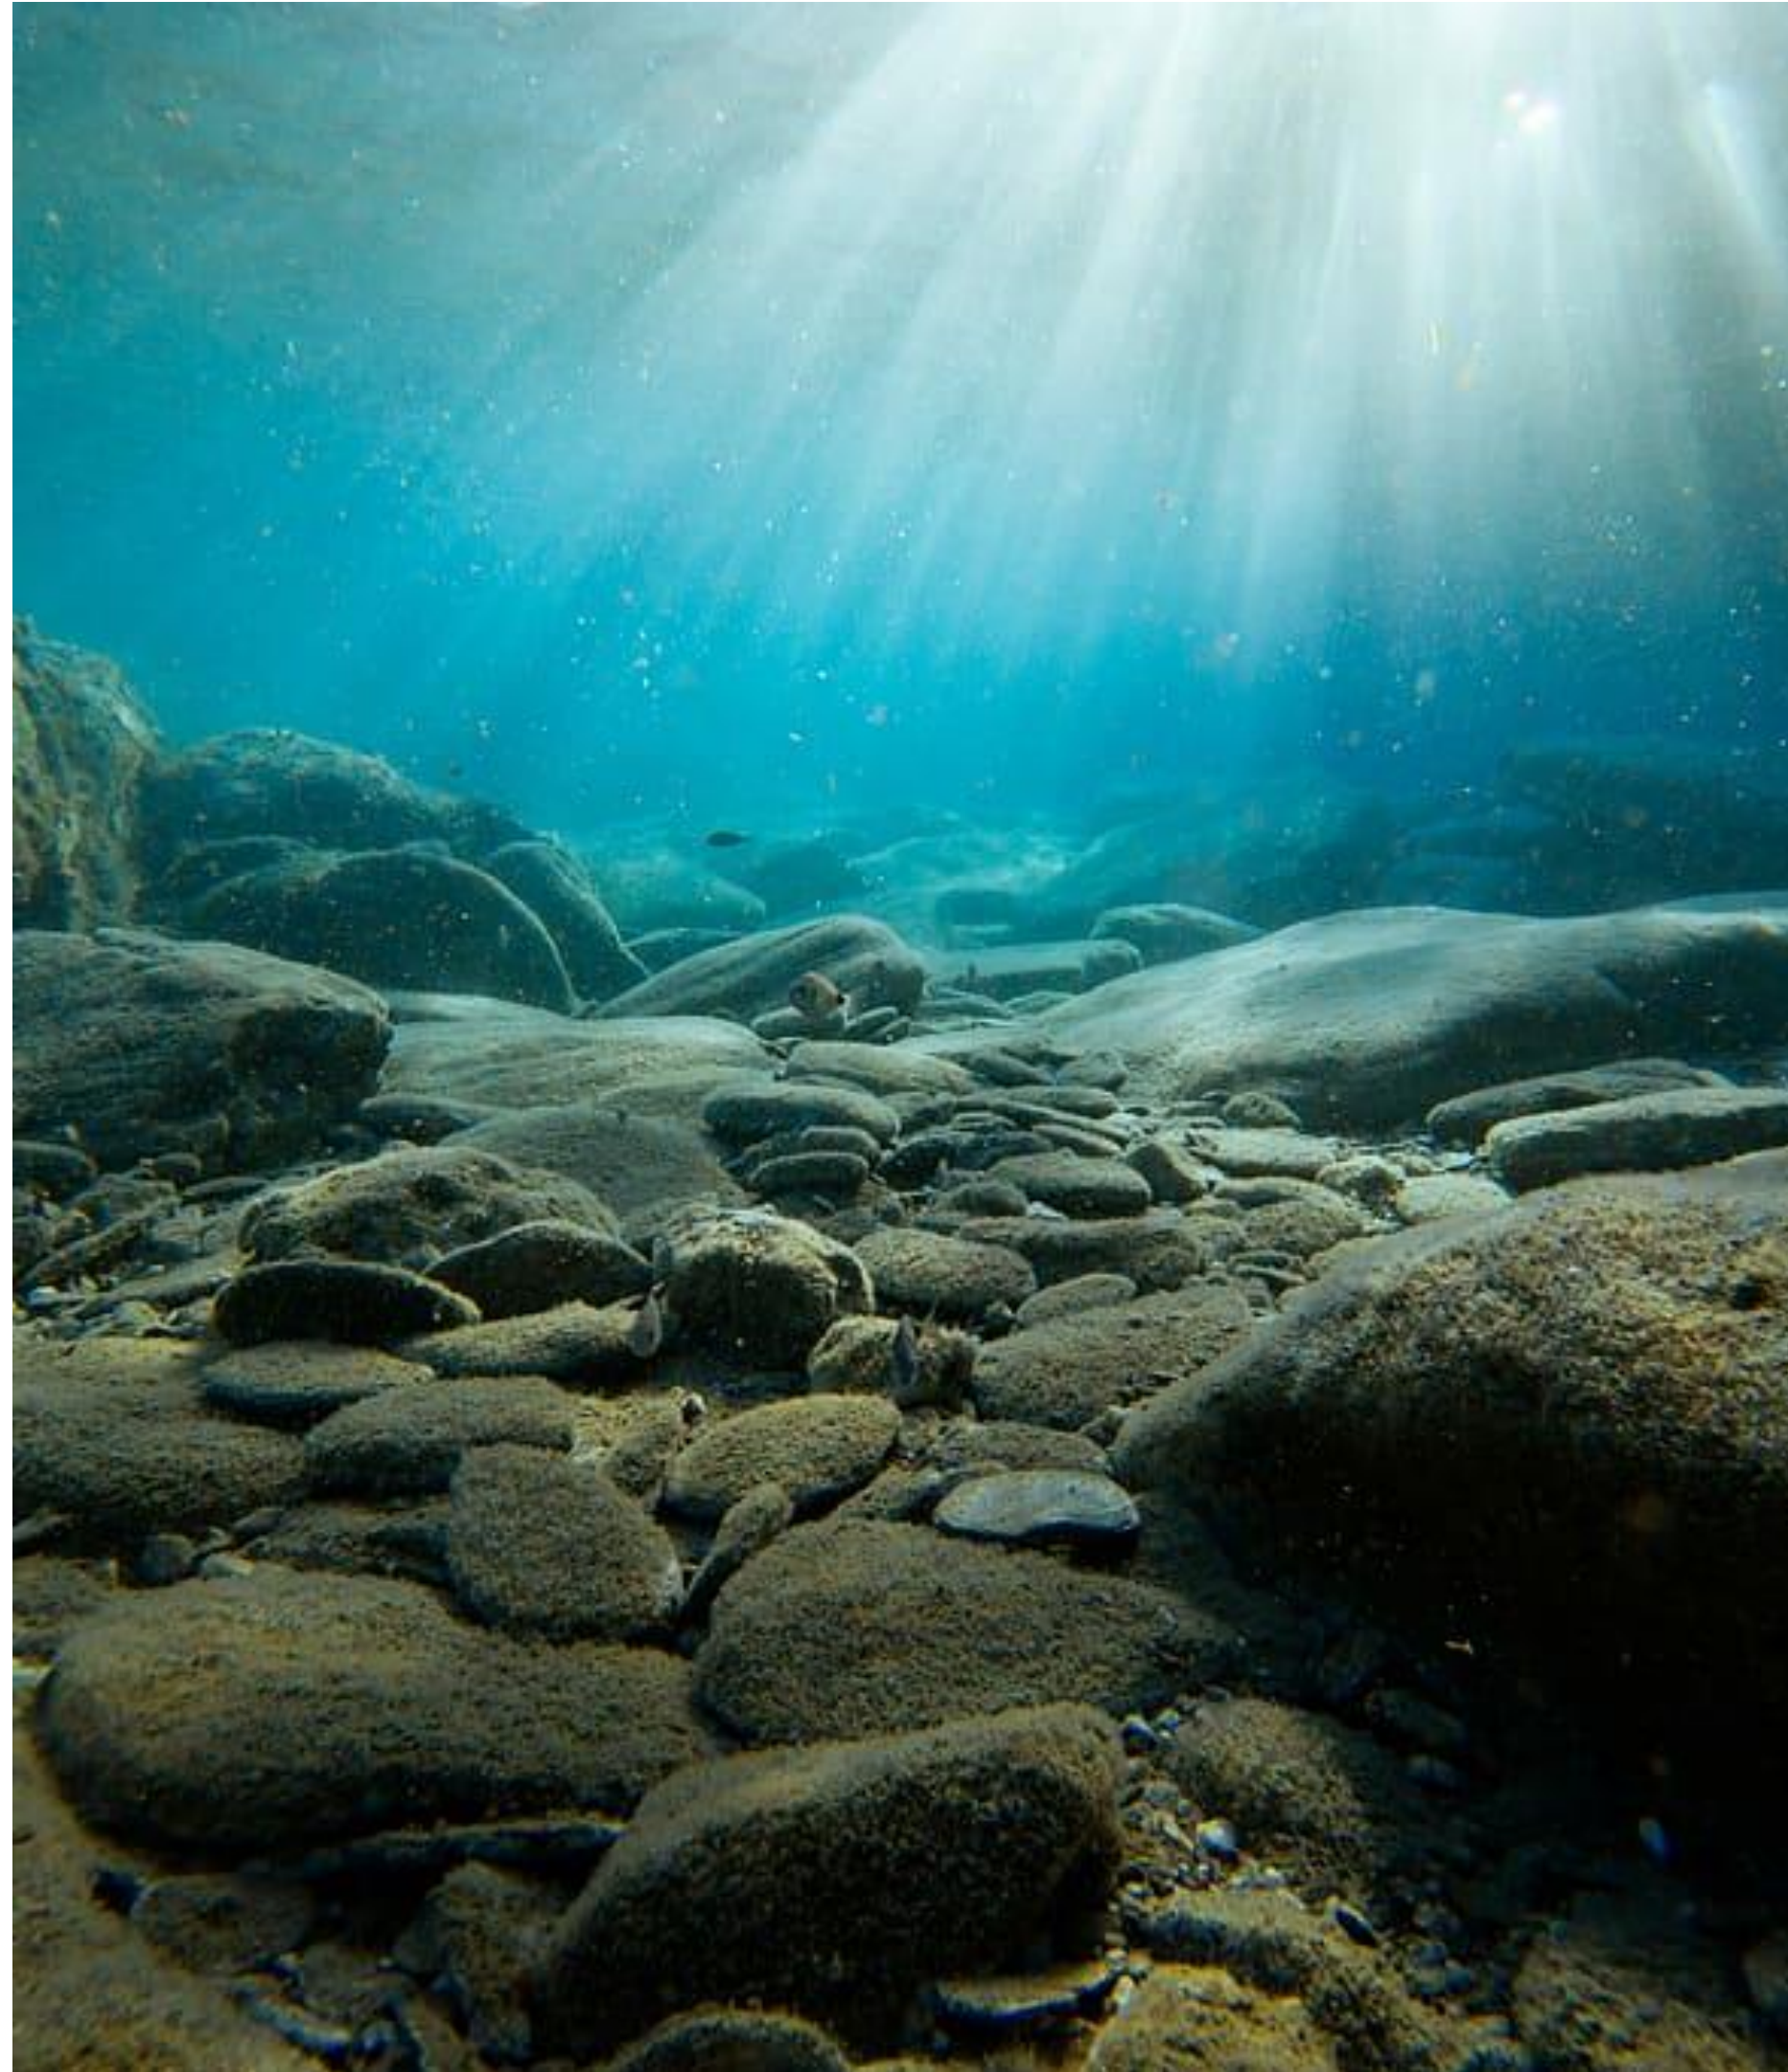

We've joined the DHL GoGreen initiative to support greener logistics. Internally, we adopted electronic signatures, cutting paper use—saving nearly 7 trees and reducing CO₂ by over 51kg. These small digital changes are delivering real environmental results.

**These figures were calculated using Co-Pilot*

Employee & Community Engagement

Sustainability is part of our culture. Our annual beach and seabed clean-up unites staff and families to protect Gibraltar's coastline. In the office, moss walls enhance wellbeing and reconnect us with nature—creating a healthier, more sustainable workspace.

Thank you

Thank you for considering our submission. No matter the outcome, we remain committed to sustainability and making a positive impact.
