

About the practice

Studio Lotus' work is grounded on the principles of Conscious design, an approach that celebrates local resources, cultural influences, a keen attention to detail and an inclusive process. Our design process includes everyone, from the principals to the interns, fostering a culture centred on a high degree of individual ownership.

Our team of 100+ people come from varied backgrounds—architects, interior designers, engineers, even graphic and textile designers. Working in a highly collaborative setting, teams operate as mini-studios within the larger studio. Democracy and transparency are key to our design process. Together, we aim to craft benchmark solutions that address society's changing ways of living and working.
