

# Pupil premium strategy statement 2025 - 2028

This statement details our school's use of pupil premium funding to help improve the attainment of our disadvantaged pupils.

It outlines our pupil premium strategy, how we intend to spend the funding in this academic year and the effect that last year's spending of pupil premium had within our school.

## School overview

| Detail                                                                                                          | Data                           |

# Part A: Pupil premium strategy plan

## Statement of intent

All members of staff and the governing body accept responsibility for 'socially disadvantaged' pupils and are committed to meeting their pastoral, social and academic needs within a caring and nurturing environment. We hope that each child will develop a love for learning and acquire skills and abilities commensurate with fulfilling their potential and, as an adult, finding employment. As a trust we endeavour to provide 'cradle to career' opportunities for our pupils to enable them to achieve, thrive and make a difference.

Our aim is for all children to achieve well throughout the curriculum, although an emphasis is given to developing the core skills, knowledge and understanding in oracy, reading, writing and maths because without these children are unable to access other subjects.

In order to be highly successful in improving achievement for the children eligible for pupil premium, we will:

- Never confuse eligibility for the Pupil Premium with low ability, and focus on supporting our disadvantaged pupils to achieve the highest levels.
- Act early and use robust diagnostic assessment to identify gaps.
- Draw on research evidence (such as EEF) and evidence from our own and others' experiences to allocate the funding to the activities that were most likely to have significant impact on improving achievement.
- Be very clear about the importance of ensuring that *all* day-to-day teaching meets the needs of each learner, rather than relying on interventions to compensate for teaching that is less than good. Quality First Teaching is paramount.
- Use achievement data frequently to check whether interventions or strategies are working and make adjustments accordingly, rather than using the data retrospectively to see if something has worked.
- Make sure that support staff, particularly teaching assistants, are highly trained and understand their role in helping pupils to achieve.
- Systematically focus on giving pupils clear, timely and useful feedback about their work, and ways that they could improve it (AFL).
- Ensure that the Senior Leadership Team has a clear overview of how the funding is being allocated and the difference it is making to the outcomes for pupils.
- Ensure that class and subject teachers know which pupils are eligible for the Pupil Premium so that they can take responsibility for accelerating their progress. This also applies to teaching assistants.

- Have a clear and robust appraisal system for all staff, and include discussions about pupils eligible for the Pupil Premium in appraisal and pupil progress meetings (PPM).
- Ensuring all pupils have involvement in activities that promote self-efficacy and belonging within our school community in-line with our school values.

## Challenges

This details the key challenges to achievement that we have identified among our disadvantaged pupils.

| Challenge number | Detail of challenge                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1                | Assessments, observations, and discussions with pupils indicate underdeveloped oral language skills and vocabulary gaps among many disadvantaged pupils. These are evident from Reception through to KS2 and in general, are more prevalent among our disadvantaged pupils than their peers.                                                                                                                                                                                       |
| 2                | Internal and external (where available) assessments indicate that age-related attainment among disadvantaged pupils is below that of non-disadvantaged pupils and they are under represented within above age-related achievement levels.<br><br>On entry to F1 in the last 3 years, 75-100% of our disadvantaged pupils arrive below age-related expectations due to social and emotional, language and physical support needs compared to approximately 40% of other pupils.     |
| 3                | Our observations and discussions with pupils and families have identified social and emotional issues for many pupils. These challenges particularly affect disadvantaged pupils, including their attainment.<br><br>Teacher referrals for support have markedly increased during the recent years. 46 children (31.25% of whom are Pupil Premium) currently require additional SEMH support, with 17 children (11 of whom are Pupil Premium) receiving small group interventions. |
| 4                | Data from enrichment activities indicates that PP pupils are under represented in this area.                                                                                                                                                                                                                                                                                                                                                                                       |
| 5                | Our attendance data has historically indicated that disadvantaged children have lower attendance than non-disadvantaged children. Disadvantaged pupils are disproportionately represented within the numbers of persistent absence data.                                                                                                                                                                                                                                           |

## Intended outcomes

This explains the outcomes we are aiming for **by the end of our current strategy plan**, and how we will measure whether they have been achieved.

| Intended outcome                                                                                               | Success criteria                                                                                                                                                                                                                                                                     |
|----------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Improved oral language skills, etymology and vocabulary among disadvantaged pupils.                            | Assessments and observations indicate significantly improved oral language among disadvantaged pupils. This is evident when triangulated with other sources of evidence, including engagement in lessons, book scrutiny and ongoing formative assessment.                            |
| Improved writing attainment for disadvantaged pupils at the end of KS2.                                        | KS2 writing outcomes in the assessment years 2026, 2027 and 2028 show that more than 80% of disadvantaged pupils met the expected standard within writing.                                                                                                                           |
| Improved maths attainment for disadvantaged pupils at the end of KS2.                                          | KS2 maths outcomes in the assessment years 2026, 2027 and 2028 show that more than 80% of disadvantaged pupils met the expected standard.                                                                                                                                            |
| Improved engagement with enrichment activities.                                                                | 100% of disadvantaged pupils access enrichment activities.                                                                                                                                                                                                                           |
| To achieve and sustain improved wellbeing for all pupils in our school, particularly our disadvantaged pupils. | Sustained high levels of wellbeing from 2025/2026 onwards demonstrated by: <ul style="list-style-type: none"><li>• qualitative data from student voice, student and parent surveys and teacher observations</li><li>• improved Thrive judgements for disadvantaged pupils.</li></ul> |

## Activity in this academic year

This details how we intend to spend our pupil premium (and recovery premium funding) **this academic year** to address the challenges listed above.

### Teaching (for example, CPD, recruitment and retention)

Budgeted cost: **£24,000**

| Activity                                                                                                                                                                                                                                                                                                    | Evidence that supports this approach                                                                                                                                                                                                                                                                                                                                   | Challenge number(s) addressed |

## Part B: Review of outcomes in the previous academic year

### Pupil premium strategy outcomes

This details the impact that our pupil premium activity had on pupils in the 2025 to 2026 academic year.

Our summative assessments in summer term 2026 show that all pupil premium children made good progress and that significant steps were made towards diminishing the gap.

By the end of FS2, 57.1% of pupil premium pupils achieved GLD, an increase of 7.1%, and in Year 1 75% of pupil premium pupils passed the Phonics Screening Check.

In Year 2, 75% of pupil premium pupils achieved EXS in maths, an increase of 35%. Also, 100% of pupil premium pupils achieved EXS in reading and writing. This is inline or above non-PP data.

At KS2, 50% of pupil premium pupils reached EXS in all areas. In reading, 50% of pupil premium pupils achieved EXS with 50% EXS in writing. Pupil premium pupils achieving EXS in maths was 50%.

Combined (reading, writing and maths) attainment was up 23% with improvements shown in both maths and writing. 50% of the PP children within this cohort were on the SEND register.

One to one and small group interventions and support have been implemented, targeted at PP children who were not on track to achieve EXS. These interventions proved to be effective and progress was accelerated for these pupils.

Our focus on developing quality first teaching has proven to be the right approach. Teaching is fully inclusive through strategies such as 'name the steps' and the 'I do, we do, you do' approach accompanied by sharp emphasis on subject specific vocabulary and use of stem sentences. Effective use of formative assessment within lessons has focussed teaching and informed pre and post teach sessions. We have moved to a culture of 'What have our pupils learnt?' and NOT 'What have I taught?' This has been informed by use of standardised tests and data analysis to create Improvement Plans for classes and cohorts, with focus on PP children.

Due to our more rigorous attendance strategy, we have improved attendance for our PP pupils to 92.8%. Although lower than whole school attendance (96.06%), the gap has diminished and is above National PP attendance (91%).

Our assessments and observations indicated that pupil wellbeing and mental health continued to be positively impacted last year. ELSA has proven to be effective in supporting individuals and groups of pupils and this funding stream will continue.

## Further information (optional)

### Additional activity

Our pupil premium strategy will be supplemented by additional activity that is not being funded by pupil premium or recovery premium. That will include:

- embedding more effective practice around metacognition. [EEF evidence](#) demonstrates this has significant benefits for pupils, particularly disadvantaged pupils.
- offering a wide range of high-quality extracurricular activities to boost wellbeing, behaviour, attendance, and aspiration. Disadvantaged pupils will be encouraged and supported to participate.
- Teacher release time to support staff to develop QFT through instructional coaching.

### Planning, implementation, and evaluation

In planning our new pupil premium strategy, we evaluated why activity undertaken in previous years had been effective in diminishing the difference between PP and non-PP and similarly those activities that had not had the degree of impact that we had expected.

We triangulated evidence from multiple sources of data including assessments, engagement in class, book scrutiny, conversations with parents, students and teachers in order to identify the challenges faced by disadvantaged pupils.

We looked at a number of reports, studies and research papers about effective use of pupil premium, the impact of disadvantage on education outcomes and how to address challenges to learning presented by socio-economic disadvantage. We also looked at studies about the impact of the pandemic on disadvantaged pupils.

We used the [EEF's implementation guidance](#) to help us develop our strategy, particularly the 'explore' phase to help us diagnose specific pupil needs and work out which activities and approaches are likely to work in our school. We will continue to use it through the implementation of activities.

During the previous academic year, Trust leaders attended Challenge Days to provide a critical friend approach to strategies. As part of this process, all staff have received professional development to support implementation of this strategy. We will evaluate and adjust our plan over time to secure better outcomes for pupils.
