

BARTLETT

— INSTRUMENT COMPANY —

Greenhouse Environmental Control System

Dual Zone Capability
2 Temperature Sensors
Included

ClimateBoss

GHK (louver/fan or forced ventilation)

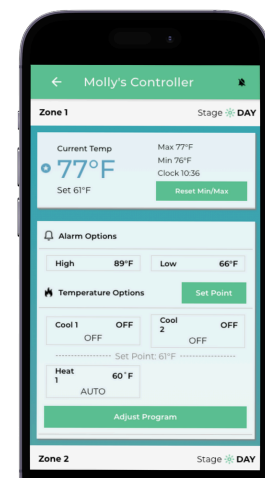

Features:

- 3 Stages for Programming (DIF, Day, Night)
- Cool & Heat:
 - 2 Stages of Heating (open/closed contacts or source 24 VAC)
 - Optional third Heat (e.g. bench, floor)
 - 4 Cool (source 24 VAC)
 - 2 Proportional Outputs - Open & Close (e.g. vents or side walls)
 - Automatic or manual settings for each Heat or Vent output
- 2 Timer Outputs for Shade, Lights or Misting
- 2 HAF relay outputs (source 24 VAC)
- Dehumidification Cycle
- Simple, Touchscreen Interface
- WiFi Connectivity;  Headgrower Compatible
- Data: Run times, statistics and 24 hr. graph
- 24 hour clock and memory with battery back-up

EasyWire:

- Custom made relay cabinet for the ClimateBoss
- Has 30 Amp relays and an easy connection terminal strip.
- Optional sealed enclosure
- (C)UL Listed
- Drawings Included

Mobile App & Desktop
access available

WeatherBoss

Adjust curtain/roof vents for rain or wind conditions.

Features:

- Programmable wind set points & delays for activation and drop-out
- Multiple alarm outputs – wind, rain, or both
- Included sensors: wind speed, rain
- Optional sensors: wind direction, outdoor temperature, light & humidity
- WiFi Connectivity; Works with 

Motor Control

VentBoss, BigBoss, ARBAM

Motor relay interface box that uses 24VAC control signals to operate vent motors

| | # Motors | Output | Input |
|--------------|----------|-------------------|------------------|
| VentBoss | 2 | 24VDC, 5A motors | 120V AC |
| BigBoss | 2 | 24VDC, 10A motors | 120V AC |
| ARBAM Models | 2 | 120VAC or 240VAC | 120VAC or 240VAC |

TimeBoss

Lighting, Shade and Irrigation/Misting control

Features:

- Up to 10 Timer Outputs
- Two run times per day, per timer
- Touch screen technology with color graphics display
- WiFi Connectivity; Works with
