Pulse

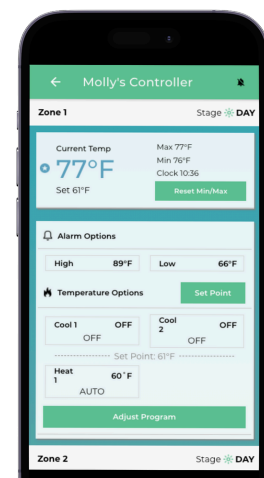

Additional Sensor + Control

The Pulse is the newest controller in our product line. It allows users to integrate a dissolved oxygen sensor to control ancillary equipment in a growing environment. Don't need a dissolved oxygen sensor? More sensor integration coming soon.

The Pulse may be triggered based on a set point or a timer schedule. Also, its Wi-Fi connectivity accompanied allows you to access and modify your control from your smartphone, with our  **Headgrower** app.

Features:

- Touch screen technology with color graphics display
- Multiple sensor options
- Output control based on sensor or timer schedule
- WiFi Connectivity; Works with  **Headgrower**
- Alarms for high and low sensor readings
- Temperature reading

 **Headgrower**
