

Dylan Le

Product Designer | UI/UX, Interaction, Visual & Experience Design

Los Gatos, CA • dyyle.design@gmail.com • (408) 483-1806 • dyyle.com • linkedin.com/in/dyyle

Experience

Product Designer (Freelance) — Consultant Work | Dec 2024 - Present

- Designed a professional portfolio for a client transitioning into a design career at Apple, aligning visual identity and UX with his personal narrative.
- Co-designed a portfolio website that translated a fellow designer's creative work into a clean, readable digital experience.
- Redesigned the **All Fab Precision** website to strengthen brand credibility and increase B2B marketing visibility.
- Leading brand identity and landing website design for **LeHansen Design**, building a system to attract clients and streamline client/vendor communication.

Web Designer — GXS Productions | 2026 - Present

- Redesigned the company website by modernizing legacy project pages and restructuring content to spotlight upcoming work.
- Improved site usability and readability through refined layouts, stronger visual hierarchy, and cleaner UI.

Interaction Designer — ArtCenter x Hermès | Jan 2025 - Apr 2025

- Collaborated with a multidisciplinary team on a 14-week sponsored studio project to develop future-facing concepts for Hermès.
- Designed an AI-powered voice recording system, integrating a physical device with a companion app for seamless audio organization.
- Drove feature development through user research, competitive analysis, and iterative usability testing.
- Presented concepts across three stakeholder reviews, culminating in a final showcase of prototypes and mockups.

Interaction Designer — ArtCenter x Alienware | Sept 2024 - Dec 2024

- Ideated a future-focused livestreaming ecosystem (2030–2035) with a three-person team to explore emerging creator technology.
- Designed end-to-end UX for an avatar-based streaming platform, covering account creation, customization, and live workflows.
- Integrated AI-driven features, including avatar generation and chatbot interactions, to increase user engagement.
- Refined the concept across multiple stakeholder presentations, evolving it into a final working prototype.

Projects

Pending Desk — In Progress | Present

- Designing and building a responsive job-application tracker as a working front-end prototype across desktop and mobile.
- Designed end-to-end workflows that automate application tracking through email parsing, status classification, and follow-up drafting.
- Built a themeable design system supporting dark and light modes, eight accent colors, and three customizable copy tones.
