Keep Traveling

WE BELIEVE TRAVEL SHOULD BE TREASURED

Travel is a wealth that accumulates with every miles behind you, with every road explored and every moment spent. It's the culmination of thousands of simple pleasures, like time spent in nature. It feels limitless when it's shared with family, friends and other adventurers. ➤ We believe traveling should be part of our lives. But we must adapt to the challenge of climate change. We feel that the distances we travel should impact nature and people as little as possible. And that the only way to keep exploring is to do so sustainably. ➤ Built for traveling light, our trailers and motorhomes are made to last. Our approach to design and development is aligned with our vision of travel. We focus on the essentials: no gimmicks, just quality and value. ➤ At Safari Condo, we treat our customers like family. Strong ties and a common passion unite us with our user communities. And just like one big family, our teams and customers join forces to work on exciting projects together. ➤ We don't just do business. We're on a mission, boldly going against the grain in an industry that's known for producing short-use vehicles on a mass scale. We have chosen to offer travelers something different: products and services that will never let them down. Our solutions are sustainable and long lasting, just like your passion for exploration. ➤ We're Safari Condo, a team that works tirelessly to safeguard our shared wealth: the joy of travel. ➤ Together, let's keep traveling.

why an Alto?

THE BIGGEST LITTLE TRAILER

Safari Condo’s story is one of an approachable company and a passionate community. It’s a symbiotic relationship that’s lasted over 25 years.

The look of our Alto travel trailers turns heads wherever they go. But it’s their smart design that truly sets them apart. Developed by dedicated outdoor enthusiasts and tested continuously in the field, Alto trailers are built with astounding attention to detail. They’re small from the outside but incredibly spacious on the inside. As a result, you can maneuver them everywhere and make the most of the road without being weighed down.

Tough and reliable, Alto trailers are designed to follow wherever your thirst for adventure takes you.

ecological footprint

A SUSTAINABLE VISION OF TRAVEL

Sustainable travel isn’t just our business. It’s our mission. The well-being of our community, our teams and the planet guides all our decisions. That’s why we’ve challenged ourselves to build quality products that retain their value for longer and reduce the environmental impact of travel.

Alto travel trailers are ultralight and have an extremely low drag coefficient. They can be towed using vehicles with a smaller engine capacity, which reduces non-renewable energy consumption. We also use sustainable and recyclable materials, minimize manufacturing waste and offer eco-friendly equipment options like solar panels. With your help, we want to be part of the solution.

Our primary objective is to allow everyone to keep traveling in a more sustainable way—now and for many years to come.

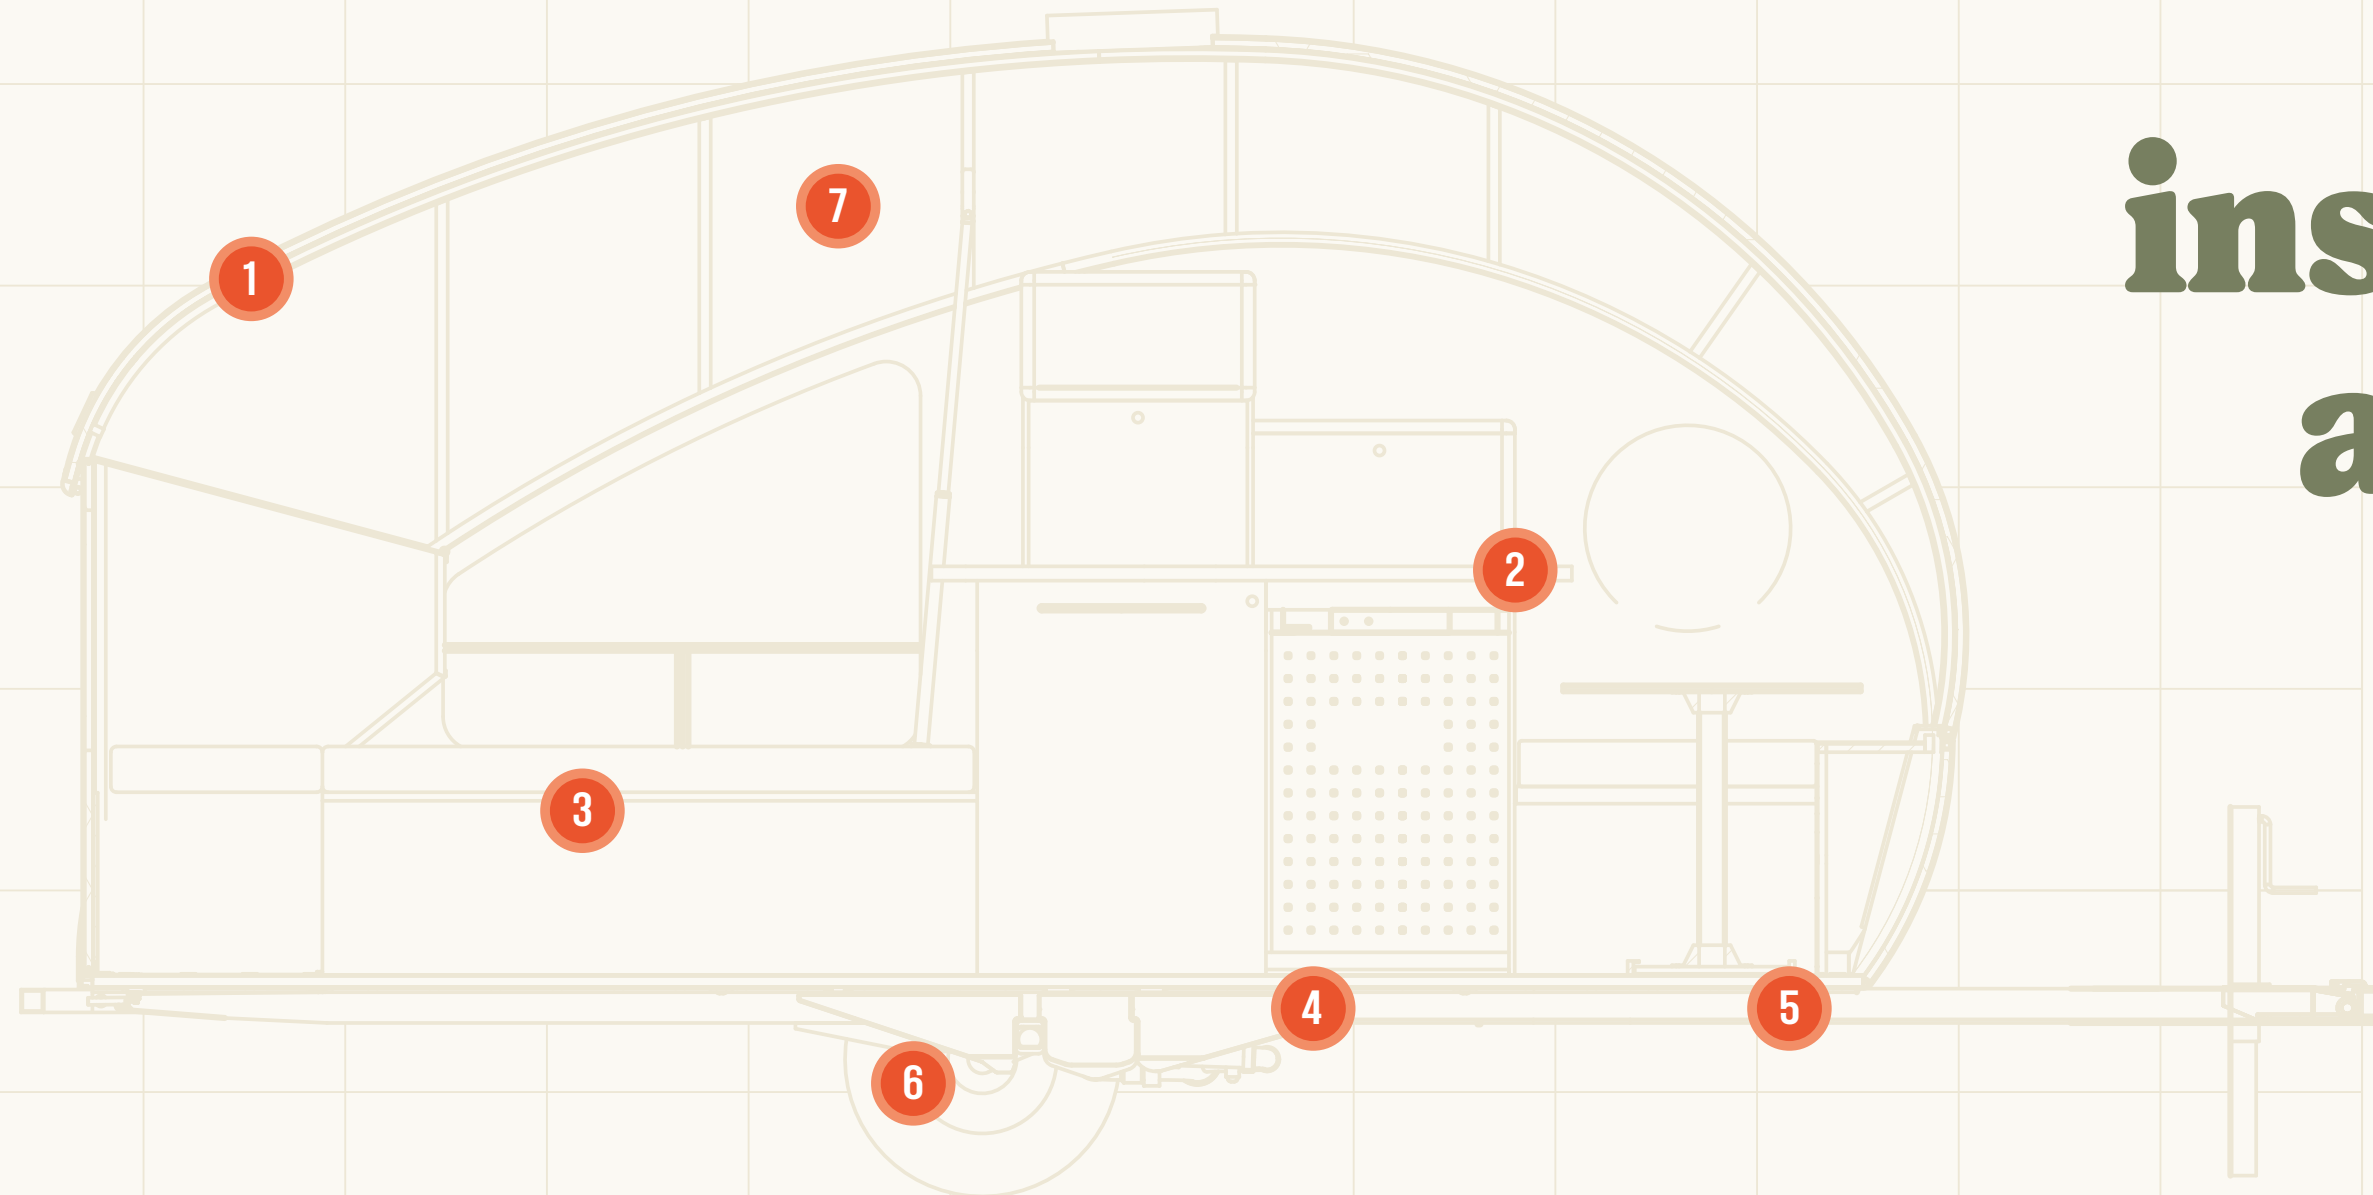

OUR MATERIALS

An Alto's roof and walls **(1)** are manufactured from a sandwich-type material. It is composed of a plastic honeycomb core laminated with aluminum on one side and AluFiber or aluminum on the other. AluFiber combines the lightness of aluminum with the durability of fiberglass. What's more, Alto trailers are made using only materials on which water has little effect, like aluminum, AluFiber, plastic, Formica and glass.

On the inside, the trailer's furnishings **(2)** are manufactured mainly from aluminum and composite materials. Ultralight, rigid sandwich panels are integrated into the bed cushions, and the bed frames **(3)** are made entirely from aluminum extrusions.

UNDERNEATH THE ALTO

Alto travel trailers boast excellent stability thanks to an independent Flexiride suspension **(4)** and a super-low centre of gravity. The floor and frame **(5)** are made from aluminum. For optimized aerodynamics, the frame is weld-free and supports streamlined tanks. What's more, powerful electric brakes **(6)** come standard on all Alto models.

inspired by aviation

ROOF AND FORM > The Alto offers two roof options: retractable or fixed. Both are designed to prevent water infiltration and optimize the trailer's aerodynamics. The retractable roof on our R-series trailers is great for storing your Alto in a garage. It also offers exceptional sunlight thanks to its crescent-shaped glass windows **(7)**. Alternatively, the fixed roof on our F- and A-series models provides optimal overhead space. This allows for spacious storage that's easy to access, as well as a comfortable shower and toilet layout.

built with care

OUR MAKERS

The people who craft Alto travel trailers are proud of what they build. Their drive to meet the highest standards is seen in the meticulous work they produce every day. At Safari Condo, we work with precise measurements and tight tolerances. We don't pressure our teams to deliver as fast as possible because we know that doing things right takes time. Whenever we see a Safari Condo product on the road, we're reminded of why we hold ourselves to such a high bar—and it fills us with pride every time.

ANTICIPATION ➤ The purchase of a new Alto involves a waiting period, which future owners experience with febrile anticipation. They know that our rigorous processes make for a high-quality trailer that can last a lifetime.

OUR USERS

Among our community, there are people for whom travel is a way of life. For these born adventurers, the Alto serves as a primary residence. This is the case for two of our ambassadors, who have traveled with our trailers for more than three years.

Justin and Jess quit corporate America to run Uprooted Traveler and explore the world full time. Their mission is to share the travel tips and tricks they learn along the way with their readers—providing advice to make travel more accessible for everyone.

This mission aligned perfectly with our own. So, it made sense for us to go on a journey together. In this document and on our online platforms, you'll see snapshots from their adventures across North America.

We hope that Justin and Jess will continue to pursue this shared passion and keep traveling!

ALTO

RETRACTABLE ROOF

CRESCENT-SHAPED WINDOWS ARE MADE FROM TINTED TEMPERED GLASS

INDEPENDENT HEIGHT-ADJUSTABLE SUSPENSION

RETRACTABLE JOINT-FREE ROOF

75% LOWER AERODYNAMIC DRAG

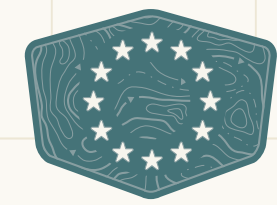

ALUMINUM FRAME AND FLOOR

FUNCTIONAL APPROACH ➤ Thanks to a retractable roof, R-series Alto models can fit in most residential garages. When the roof is open, our trailers offer a very comfortable indoor space with an interior height of 82 inches (2.08 m). The front dining area can be used even when the rear bed is deployed. The beds, fridge, toilet and storage are accessible when the roof is down. What's more, you can create two separate dining areas by moving the table. An interior shower option (model R1723) is also available.

RETRACTABLE ROOF ➤ The roof's surface is made from a single, joint-free piece of aluminum, and its mechanism is powered by electric linear actuators. When the roof is lowered, the Alto's drag coefficient is 75% lower. This is thanks to its aerodynamic shape, which was developed in a virtual wind tunnel. This factor, alongside the trailer's lightness, makes the Alto ideal for towing with most compact cars and small SUVs.

F1743

EUROPEAN FLAIR

Imported from Europe, the panoramic windows in the F series have double-glazed acrylic panes, making them impressively light and providing enhanced insulation. Equipped with a combined blind/screen system, these windows open so wide, you'll almost feel like you're outside. The front dining area has a huge, curved window and can be used when the rear bed is deployed. By moving the table, you can create two separate dining areas.

DISTINCTIVE FEATURES

- EXCEPTIONAL WINDOWS THAT CAN OPEN TO THE OUTSIDE
- LIGHTEST TRAILER IN THE ALTO LINE
- INTERIOR DESIGNED FOR UP TO 4 PEOPLE
- LARGE ENCLOSED TOILET/SHOWER CABINET

LBS 1,877 lb.

EXPEDITION MODEL ➤ Built to take you off the beaten path, the Expedition offers the same comfort as the classic F1743, but with more off-grid features. It comes standard with a purpose-built roof rack, 385-W solar panels (570-W option available) and a 10-ft. box awning. What's more, the Expedition model includes two lithium batteries (four-battery option available), a power inverter and two propane tanks. With its black aluminum wheels and adventure tires, the F1743 Expedition will take you farther than ever—for longer than ever!

F 2114

FIXED ROOF

With its roomy interior, this model offers spacious storage that's easy to access. It also boasts a large private shower/toilet. Rounded in the front and back like the F1743's roof, this model offers great aerodynamics that make it easy to tow with most SUVs.

DISTINCTIVE FEATURES

- SPACIOUS INTERIOR DESIGNED FOR FOUR PEOPLE
- LARGE ERGONOMIC STORAGE COMPARTMENTS
- BRIGHT AND SPACIOUS FRONT DINING AREA FOR FOUR
- EQUIPMENT ALLOWS FOR GREATER AUTONOMY

MORE ALTO TO LOVE ➤ Keeping the same materials and the same large windows as the F17 series, the F21 series offers a more spacious interior and more generous storage. Designed to fit 4 people comfortably, this series includes both king and queen size beds, larger water and propane tanks, a roomier fridge and

a more powerful combined heater/water heater system. The 4-seater front dining area has kept its huge curved window, and remains usable even when the rear bed is deployed. Furthermore, the table can be moved and attached to the side of the trailer to create an exterior dining area.

F2414

AS LIGHT AS IT GETS

The F2414's 2,933-lb. base weight puts it in a class apart. No other 24-ft. travel trailer offers so much space at such a light weight. The Alto's classic rounded shape provides exceptional aerodynamics. This means that F24-series trailers can be towed by many medium-sized SUVs. The F24 series is also the Alto's first tandem-axle range. This gives the trailers excellent stability on the road and more loading capacity.

DISTINCTIVE FEATURES

- THE LIGHTEST 24-FT. TRAVEL TRAILER ON THE MARKET
- KITCHENETTE WITH HUGE COUNTERTOP AND LARGE DRAWERS
- SEPARATE TOILET AND SHOWER
- BRIGHT AND SPACIOUS FRONT DINING AREA FOR FOUR

ENJOY YOUR OWN SPACE ➤ The F2414 is the roomiest Alto model. It was designed for those who want to travel without trade-offs. To offer everyone more privacy, the toilet and sink are separate from the shower. The four-person dining area in the front and the conversation nook in the back make for a functional interior where no one gets in each other's way.

The model's large countertop, outdoor table and spacious storage are great for foodies, families and those who like to travel with lots of equipment. The model also boasts one king bed and one queen bed, giving everyone the space to sleep comfortably and wake up ready for the next adventure!

A2124

WIND OF CHANGE

The A2124 has undergone 11 virtual wind tunnel tests. The result? The most aerodynamic travel trailer ever designed by Safari Condo, with a 47% lower drag coefficient than other models. This factor, combined with its lightness, means that the A2124 provides the lowest towing costs on the market. The forward-looking Alto A2124 was born of Safari Condo's commitment to reducing fossil fuel use and driving the shift to electric vehicles.

DISTINCTIVE FEATURES

THE MOST EFFICIENT TRAVEL TRAILER FOR TOWING ON THE MARKET

ECO-FRIENDLY, WITH NO TRADE-OFFS ➤ With its stunning aerodynamic shape, the A2124 retains the Alto's DNA. It is built from the same materials as the other models and uses the same assembly technology, making it just as durable. However, its interior is brighter and more spacious thanks to large windows and ample

storage. Built to accommodate up to four people, the A2124 is equipped with the same rear king bed, refrigerator, water and propane tanks as the F2114. This new travel trailer also boasts innovative features, like a pivoting legless table in the front dining area.
